Professional Survey of York Presbytery
The effects of urbanization in York Presbytery of the United Church of Canada will be analyzed and studied by the Presbytery. The Presbytery is aware of the extensive changes taking place within the area of its responsibility.

The Presbytery at its meeting held in Keswick on Tuesday, March 16th, authorized its Executive to engage the services of

a professional survey firm, Project Planning Associates Ltd., to carry out an objective survey and study, which will encompass the entire area of the Presbytery. Included in the project will be a survey of existing conditions, involving an examination of the present Congregational constituency and an examination of present facilities.

The survey will also provide a determination of anticipated development, including estimates of future population, projection of future land use, and analysis of future United Church membership and likely residence of membership.

The Chairman of Presbytery, Dr. A. F. Binnington, reported that it is the aim of the Presbytery to utilize the information gained through the survey to lay plans that will enable the Church to more effectively carry out its work, and provide for growth in the future.

WHY DOES SHUR-GAIN FERTILIZER SPREAD BETTER?

At a quick glance SHUR-GAIN Selected-Granulated Fertilizer may look very much like most other kinds of granular fertilizers—but there is an important difference. Most ordinary fertilizers and practically all custom blended ones consist of a dry mixture of fertilizer materials either in powder or granular form.

As a result the different ingredients vary in size and weight. You can compare it to a handful of ping-pong balls, mixed with marbles. If you throw out a handful of these, the heavier marbles will travel farther than the ping-pong balls—and that is exactly what happens with ordinary fertilizers.

When you spread your fertilizer, with a drill or even more important, with any broadcast-type spreader you can be sure that every particle (from the smallest to the largest) of free-running SHUR-GAIN Selected-Granulated Fertilizer is nutritionally balanced, no matter where it lies—assuring you of complete and even intake of all the plant food by your crops. There are no excesses in one area and starvation in another with SHUR-GAIN.

Another good reason why you can be confident of top returns from SHUR-GAIN—the finest fertilizer for your good earth!

Be sure to discuss your spring Fertilizer program with your local SHUR-GAIN Fertilizer dealer
