\$500 Paid At Auction For Surrey With Fringe on Top

Not all the "rare days" fall in June as witnessed last Saturday. If good things must end, a fine day helps and in weather department, the Rodick family had every co-operation on the day of their farm sale. Bright sunshine, blue sky, cherry blossoms and song birds all contributed to the carnival atmosphere as families sauntered under shade trees or followed the auctioneer's song out behind the barn. In the house, all was bustle with Miss Mary Rodick and her helpers serving meals to what must have seemed like 5,000 as place after place was set at the long dining room table. And out in the driving shed, women from Brown's Corners U.C.W. served coffee and sandwiches to hungry buyers. The Rodick family farming days date back to the mid-1800's and there were many interesting implements among the sale goods. One buyer purchased \$500 worth of yesterday, including a buggy, complete with fringe and drive shaft. Family members included the newest little addition, Andrea Rodick, daughter of Mr. and Mrs. John Rodick; Mrs. Wm. Rodick and Grace; Mrs. Morrison Sellar of Bramford, and Mr. and Mrs. James Rodick. There were many old friends present along with auction sale followers from as far afield as Brampton and Barrie.

CHIROPRACTIC VIEWPOINT: NEW DISCOVERIES?

Public interest and news articles on health are frequently featuring as new and original, recent discoveries in the never-ending search for health restoration.

Of particular interest to the chiropractic profession is the recurring corroboration being given to the chiropractic principle that spinal vertebrae when displaced cause nerve interference that results in ill health. By chiropractic adjustments, nerve interference is removed, bringing about a return to health.

Doctors of Chiropractic find this recent corroboration of the profession's principle most refreshing, following years of severe criticism, derision, and innuendo. History shows that anything worthwhile and of great benefit to mankind must first successfully withstand the scorn resulting from condemnation without investigation, before it is finally accepted.

The public is becoming more aware of the increasing attention being focussed on the spine and nerve interference as one of the most common causative factors responsible for ill health.

The development of such an important and firmly-founded health principle has enabled the chiropractic profession to render a unique and valuable service in health problems.
