EDITOR'S MAIL

Stouffville, R. R. 2, May 17, 1963.

Editor, The Tribune,
Dear Sir:

There has been quite a bit of controversy lately in The Tribune with regard to the condition of the roads in the Stouffville-Bloomington and Musselman's Lake area. The same old problem is back with us once again—gravel trucks.

What is a gravel truck? It's a mechanical box weighing up to 25 tons and capable of speeds up to 100 miles per hour. It's a real hazard on the road and especially so, when the roads are not up to par.

I am sure that there are many people living in the Twp. who are not aware of the existence of this problem. If you drive along the Bloomington Sideroad or the 9th conc. on any week day you will see for yourself. If you see a cloud of dust, move over, for one of the gravel giants is on its way.

Do you think it's fair for the residents of these areas to endure this abuse any longer? I know for a fact that there are many respectable people living in this district who have invested their entire life savings in a house on the edge of this "dust bowl".

I am not condemning the driver of this "menace" because it is a source of income for him and his family. I think, however, that there is a solution to this problem. (1.) I would zone truck traffic entirely to the Bloomington Road. (2.) I would get the township council to pass a bylaw and restrict all outside dump trucks from coming into the township. If they are to operate within the municipality, they would be required to obtain a special permit in order to use our roads. (3.) I think that the council and the gravel pit operators should get together and discuss this thing thoroughly and come up with a solution.

I know that a good deal of the taxpayers' money is being wasted every year because of gravel truck operations. I think it's about time that the council pulled up its socks and progressed past the horse and buggy stage. We, the people of Whitechurch Twp., put these men on council and its about time we received some satisfaction for the money spent in taxes for road maintenance.

In the past few weeks, I have been in touch with the Police Dept., the Township Clerk and one council member in an effort to check the many serious accidents that have occurred in our area. I understand that they have no solution. I know well that this problem must be solved by the general public. How can this be done? (1.) Approach the Dept. of Transport and the Dept. of Hwys. and if they can't come up with an answer, go to the Federal Government for advice.

Sincerely,
Patrick Cashman.
