**Ontario County Safety Meetings**

Three Safety Meetings for 4-H Agricultural Club Members were held in Ontario County as follows — Monday, June 21st, Uxbridge Secondary School; Tuesday, June 22nd, Brooklin Twp. Hall; and Wednesday, June 23rd, Cannington, Brock Dist. High School.

The meetings were arranged in an attempt to impress upon 4-H Club Members the dangers existing on our farms, and to stress the need for greater safety measures in various farm activities.

Mr. Lynn Fair, Agricultural Representative, in his opening remarks to the Club Members, outlined some of the statistics that came out of the last Farm Accident Survey conducted in Ontario County in 1959 and 1960. This survey indicated that in a period of one year, there were 14 fatalities to farm people involving 8 Men, 2 Women, 3 Boys and 1 Girl.

Mr. Fair also indicated the value of using such safety devices as the new Slow Moving Vehicle Signs which are now available from the Uxbridge and Port Perry Junior Farmers, and also from the Ontario Department of Agriculture Office, Uxbridge.

Mr. Howard Nodwell, Agricultural Engineer for Ontario County, presented an illustrated talk on safety in the operation of farm machinery.

Representatives from the St. John Ambulance Association were also present to demonstrate "First Aid" practices including the more recent techniques in artificial respiration.

Mr. Bill Cooper, Assistant Agricultural Representative, presented Red Seal "Awards of Merit" to qualifying 4-H Club Members. To be eligible for this award, a member must successfully complete six 4-H Agricultural projects with 75% or more. In addition, 4-H Club Members, completing 12 or more 4-H Agricultural projects with 75% or more, were awarded a Gold Seal "Award of Merit" in recognition of their outstanding achievement. Gold Seal recipients were — Wayne Beath, Oshawa RR 2; Doug Batty, Brooklin, RR 1; Gary Batty, Brooklin, RR 1; Jack Holiday, Brooklin, RR 1; Bruce Martyn, Port Perry, RR 2; George Smith, Port Perry, RR 2.

The 4-H Club Members qualifying for the six project Red Seal Awards are as follows — John Armstrong, Sunderland, RR 1; Grant Beath, Oshawa, RR 2; Harold Guthrie, Whitby, RR 2; Bill McDonald, Brooklin, RR 1; Donald McTavish, Uxbridge, RR 3; Bruce Norton, Claremont RR 1; Keith Phoenix, Greenbank; Malvin Ross, Uxbridge, RR 2; Kenneth Stickwood, Claremont, RR 2; Bertha and Beatrice Samis, Cannington, RR 2; Allan Wellman, Claremont, RR 2; Jim and John Wilson, Balsam; Fred Waines, Cannington, RR 1.

**SHORTAGE OF RAIN CREATING DROUGHT**

Farmers in Ontario County face a shortage of hay and winter feed next winter as a result of drought condition in the area.

H. L. Fair, agricultural representative for Ontario County, said that drought conditions during a "severe" stage this week and if ample rain does not fall in the near future yields from the spring grain and corn crops will also be affected.

He said the hay crop has been hit quite hard. He estimates there will not be more than one third to a half of a normal crop, even if it rains today. Should moisture conditions change it might be possible to make up some of the shortage on the second cutting.

The lack of rain is also hitting pasture land. Cattle are eating up the available grass and it is not growing back due to the lack of moisture. This means that by fall farmers will be forced to use this year's hay as feed.

Corn and spring grain crops have not been as hard hit as hay; but they are not making the growth they should at this time of the year. This type of crop will have to have an ample supply of rain in the near future, Mr. Fair said.

Scattered localities in the county had rain Thursday night. The section of the county north of Brechin reported a good rain but in other sections the fall was spotty.

Mr. Fair added that practically all sections of the province are experiencing drought conditions. Eastern Ontario and the Ottawa Valley, which suffered from a lack of rain last year, has been hard hit. Only a small section of Western Ontario is not affected.

**North York Farmers Open New Feed Mill**

Farmers can get every kind of feed service they want from North York Farmers (Feed & Grain) Limited, new mill in Newmarket. Construction of the large mill, warehouse and showroom began last fall, and it was completed and open for business in early June. The building which reaches several stories high, to accommodate the great storage bins and elevators, is very obvious at the corner of Davis Drive and 3rd concession in Newmarket.

Joe Hall, manager of the new mill says, "Livestock and poultry production has greatly increased in York County in recent years. This is going to continue, and with our modern feed mill we are ready to supply the needs of farmers who want to produce more meat, milk, and eggs for the giant Metropolitan market right at our doorstep."

The new mill has a capacity of 60 tons of livestock and poultry feed in an 8-hour day. In addition there is complete equipment for receiving and shipping bulk grains and other ingredients used in formulating balanced rations for livestock and poultry. The large feed mixer handles a ton and a half at a time and can also mix in molasses for special livestock needs. Other services offered by the

**Tree-Planting Program Pays Off On Mt. Albert Farm**

Often when forestry staff from the Department of Lands and Forests are speaking to the public and trying to interest them in reforestation, they will be asked, "Will trees planted now really make a difference on my property in 20 to 30 years?"

During the past 2 summers, a private plantation survey was undertaken in the Lake Simcoe District. In the past several months, Timber Foresters from the Department have been making follow-up calls on people initially contacted during the survey.

One such call was made on January 14th by R. N. Staley and R. M. Monzon, on Mr. Carmen Boadway of Mount Albert. Mr. Boadway stated that he had bought the farm 4 years ago and that the Scots and white pine plantation, on the property, was one of the major features which had influenced him to finally purchase the property.

The laneway into Mr. Boadway's property is approximately one-fifth of a mile long, bounded on both sides by flat, wide, open fields, giving the whole area a very barren appearance. When one reaches the house, however, the scene changes completely. The house, yard and the small orchard, across from the house, are all surrounded by large spreading maples, towering spruce and bushy cedars. The barn, which is just north of the house, is protected from the wind by a plantation of Scots and white pine. These trees were planted in 1928 and now have an average height of 50 feet and an average diameter of 10 inches. The plantation covers about 5 acres and was originally planted to stop the sandy soil from blowing away but now its primary use is to provide a windbreak for the house and barn. The plantation is long and completely sheltered from the north and partially sheltered from northwest winds as well. Mr. Boadway remarked that because of the windbreak, it cost him very little to heat his house, and when he stepped outside in the winter, he would hardly be able to tell if the wind was blowing or not, so completely is the protection he receives from the plantation.
