CO-OP SOW FEED PROGRAM

Co-op* Dry Sow Ration
 For full feeding gilts or dry sows. The gilts should be placed on this feed as soon as they are selected for breeding. The sows should be changed over as soon as their litters are weaned. CO-OP DRY SOW RATION will permit the sows to produce larger litters of stronger, heavier pigs.
Nursing Sow Ration
 For full feeding sows after farrowing. The sow should consume 4 lbs. of feed for herself and 1 lb. for each pig in the litter daily.
 Available from
STOUFFVILLE CO-OP

W.I. Donates Poster Prizes
PINE ORCHARD — The Women's Institute meeting was held at the home of Mrs. J. Gillham on Wednesday. The school posters and essays on safety were on display and the pupils are to be congratulated on their splendid efforts. Prizes have been donated by the W.I. Mr. and Mrs. Robt. Cody are holidaying in Jamaica.

Mr. and Mrs. Edson Johnston of Queensville were Sunday dinner guests with the W. Johnston family.
 Mrs. Dorothy Cody is spending some time with her sister-in-law, Mrs. Allen Cody, who has been confined to bed suffering from shingles since arriving home from Western Canada.
 Messrs. Bill Dike, Harry Brammer and Albert Boake are among the men in the northland hunting.
 Mrs. Wood entertained Mrs. Robinson and Miss Jean on Sunday.

Want Power Systems Out of Council Hands
 The Ontario Municipal Electrical Association has sent a newsletter to all municipal councils to the province asking their support against any move to bring municipal hydro systems under the direction of the councils.
 Such a move was suggested recently by Murray V. Jones, a special commissioner appointed

Guard The Shrubs Against Rodents
 One of the most frustrating experiences for any gardener is to discover in the spring that young fruit trees, lilacs and many other newly set out shrubs have been girdled by rabbits or mice.
 The damage from rabbits in particular seems to be on the increase, and is always heavy in winters when the snowfall is heavier than usual.
 The snow prevents the rodents from being able to reach their normal supply of food.
 Experience has shown that the only sure way of protecting your trees and woody plants when they are young is to use metal tree guards or heavy paper.
 The wire protectors are much preferred because they not only protect the trees from rabbit, mole or mice injuries, but they also serve as good protection from lawn mower damage during the summer months.
 Extend the metal tree guards into the ground for at least two inches.
 In some cases rodents will burrow down under the wire guard but this can be prevented by placing crushed stone, cinders or coarse gravel around the base of the tree to a depth of 2½ inches.
 Stones and cinders also make an excellent mulch for preserving moisture.
 If you don't have cinders or stones around the tree the best plan is to practise clean cultivation and keep grass or any humus material away from the tree guard to discourage mice from burrowing into the mulch and in the end getting at the bark of the trees or shrubs.
 Or prune the fruit trees right after Christmas and let the trimmings lie around because even rabbits must eat.

Glimmer of Hope For F.A.M.E. Shareholders
PAISLEY, Ont. — The ailing Farmers' Allied Meat Enterprises Limited has received a new offer from the owner of the Fearman Packing plant in Burlington, the co-operative's president said Monday night.
 Melvin Becker of Ayr told Bruce County shareholders, however, that the offer from E. R. Gunner of England could not be revealed pending a directors' meeting in January.
 The abortive purchase of the Fearman plant in August, 1964, cost F.A.M.E. its \$1,500,000 down payment when it failed to meet a \$1,000,000 second payment deadline.
 Mr. Gunner, by an agreement signed by the co-operative's previous board of directors' claimed the \$1,500,000 for forfeit in November, 1964.
 The action led to a royal commission inquiry which criticized F.A.M.E.'s management for negotiating the Fearman transaction.

LAFF OF THE WEEK

 "Any job openings for helicopter pilots?"

Mrs. George Byer Heads U-M W.M.S.
 The Stouffville United Missionary W.M.S. held their annual re-organization meeting on Thursday evening at the home of Mrs. Clarence Pipher. Rev. Walsh conducted the election of officers.
 Officers for 1966 are as follows: Pres., Mrs. George Byer; Vice Pres., Mrs. Garth Good; Sec., Mrs. George Timbers; Asst. Sec., Mrs. Carl Reesor; Treas., Mrs. Don Doner; Asst. Treas., Miss Vera Tarr; Sewing Convener, Mrs. Albert Hudson; Sewing Helpers, Miss Mabel Hoover, Mrs. Mervyn Brethour, Pianist, Mrs. Harvey Byers; Asst. Pianist, Mrs. Harold Grove.

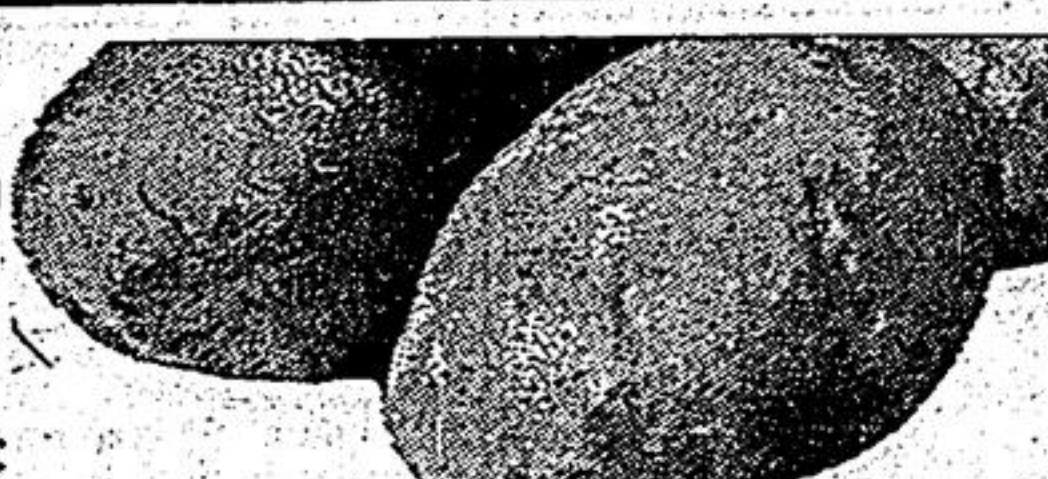

to the proper moisture content before it is used. All soils, when ready for potting, should be just moist enough to hold together when squeezed.
 Formalin may be used for chemical sterilization. Do the work outside or in a well-ventilated area as the fumes are very irritating to the nose and eyes.
 Use 37 percent commercial formalin at 2½ tablespoons per bushel of soil and thoroughly mix in. Put the treated soil in a clean garbage can or other metal container. Cover with wet newspaper to seal in the fumes and put the lid on. Leave it for 48 hours. Then spread the soil out on newspaper until all odour of formaldehyde is gone.

Following the election of officers the regular business was conducted by the president Mrs. Lloyd Wideman. Mrs. Ed. Herbert led in the prayer time.
 The program for the evening was in charge of Mrs. Robert Paisley and Mrs. Robert Stover. A poem "Seven Humble Instruments" by Mrs. Paisley was followed by scripture reading and prayer by Mrs. Stover. Readings were given by Mrs. Carl Wideman on "Guidance", Mrs. Stewart Wideman, "Live by the Day" and Mrs. Garth Good, a devotional.
 Duets were sung by Mrs. Robert Paisley and Mrs. Stewart Wideman. Readings, "My Daily Wish" by Miss Dorothy Moyer, "Perseverance" by Mrs. Carl Reesor, "The Church is the Rock" by Mrs. Burland and a message to Garcia by Mrs. Herbert. Mrs. Al Hudson closed in prayer. There were 30 ladies in attendance. A work meeting will be held in the church on Nov. 25 and a devotional on December 9.

Mix Potting Soils For Indoor Planting
 Winter will soon be here, so before the ground is frozen why not mix together a quantity of potting soil to see you through to spring? Horticulturists with the Ontario Department of Agriculture state that a good garden soil is one that has lasting fertility, a suitable structure to allow air and water penetration, holds moisture, and is free from weed seeds, insects, and diseases.
 Good compost or garden soil may be used as a base when making your potting soil. Seven parts of either of these, with 2 parts organic matter such as well-rotted leaf mold or peat, one part well-rotted manure, and two parts building sand will make a suitable soil mixture. Add one four-inch flowerpot full of superphosphate to each wheelbarrow (two and one-half bushels) full of the mixture. If the soil is known to be low in fertility, add a complete fertilizer such as 5-10-15 at the rate of one-half of a four-inch flowerpot full of fertilizer plus one-half pot full of superphosphate. Be sure the soil is well mixed; failure to do so could cause damage to the roots if it came in contact with the fertilizer.
 The soil should be sterilized before it is used. This kills weed seeds and most soil-borne diseases, resulting in healthier plants. The greenhouse operator usually sterilizes with steam, but small amounts of soil can be sterilized in the oven by the home gardener. In this method, place a pan of moist soil in the oven and heat to 180 degrees F for at least 20 minutes. Boiling water may also be used but care must be taken to see that the soil reaches a temperature of between 170 and 200 degrees F. The soil must drain and dry
