Marian McCowan

Receives B.A. degree

By Pat McClellan

CEDAR GROVE — In January, 1962, Marian McCowan began work on a B.A. degree at McMaster University. Not an enrollment course of three years with September to May on campus and summers to work or play. No, this was the hard way — by correspondence, summer school, hard work at home and an abandonment of fun activities. It is a grueling way to earn a degree and few who begin stick it to the end.

Marion last Friday graduated with a B.A. in General Arts with major in Religion.

Among those attending the Convocation were Marion's parents, Mr. and Mrs. Ed McCowan, her brothers George and Jim and

Jim's wife, an aunt and cousin from Toronto and Myrtle and Helen Hamill.

A hundred friends and neighbors honored Adeline Brubacher and her groom at a shower at the home of her parents, Mr. and Mrs. Willis Reeser.

We extend sympathy to Jack Bielby who received word of his brother's death recently. Jim Bielby lived in Kinistino, Saskatchewan.

Misses B. Bray and F. Timson are visiting with Mr. and Mrs. H. Bray and family of Toronto for a few days.

Ladies Aid will hold their regular meeting at the home of Mrs. D. Draper, June 19 at 8 p.m.

Does Taking Good Care Of Your Car Pay Off?

It surely does — and the pay-off time is not only when you trade it in. It is during its driving life: in safety, reduced costs and the pure pleasure of a better ride.

Neglect in a new car begins when the glamour wears off — after the first three months — and is worst in the UNSEEN components the driver is not immediately aware of.

What most motorists don't realize is that all moving parts wear to the same degree as the tires and engine. The result of neglect is eventual break-down.

In simple dollars and cents terms, if you wait for breakdowns to remind you of maintenance requirements, the rule of thumb is that you normally increase repair expense two thirds over what you would otherwise pay.

Simple recognition that oil and grease are far, far cheaper than machined parts is a good place to start, since this neglect is the most common and expensive of all.

Then give regular thought to your front wheel balance and alignment. Adequate maintenance here will save your tires, make for a safer and more comfortable ride and even save you gasoline. The same advantages — and penalties apply to shock absorbers and a hundred other items.

The resale market value of a well-maintained car over a neglected one cannot be stated specifically in general, but it is not uncommon for condition to reflect a two to five hundred dollar price differential.
