

Boy and bike bow to bus for school transportation

Nine year old Mark Petty, son of Mr. and Mrs. Ken Petty, Victoria Square, would dearly love to ride his new Raleigh motorbike to school and show it to all his friends. But with the bus going right by his door, he'll have to leave his two-wheeler at home. Mark won the bike in a lucky draw sponsored by Fred Lewis and Son, of Altona Feed and Supplies.

Fertilize Hay and Pasture

THE CO-OP* BULK SPREADING WAY

EARN MORE SAVE MORE

Balanced fertilization of hay and pasture fields in late Summer and Fall insures winter hardiness and early, rapid and uniform growth next year. These advantages add up to yield increases of at least three-quarters of a ton of forage per acre. General recommendations are for 0-20-10 on clay soils and 0-20-20 on lighter land at 300 lbs. per acre each year. (If application is not made each year, larger amounts are recommended).

Maximize Profits — set yield goals and shoot for them. Fertilizers represent the most effective means of increasing yields and profits.

Use Co-op bulk spreading service and reduce your labour and machinery costs. Co-op bulk spreading saves you time and effort and actually costs very little. Your fertilizer is spread at approximately bag prices. With Co-op modern equipment you are assured of fast service and uniform distribution of the fertilizer.
