

Manager Michael Crompton (right), with a visitor, looks at the sign in front of the new all-electric Area office, which will serve Ontario Hydro's Newmarket Area. This office will replace the Richmond Hill and Sutton Area offices. It is situated at 301 Mulock Drive, in the Northeast sector of Newmarket. Some 90 staff members will be accommodated in this building. The Newmarket Area office is centrally located so that customers in the new area will be served economically and efficiently. —Ontario Hydro photo.

Ontario Hydro to open a new area office

Ontario Hydro's Newmarket Area office, a modern all-electric headquarters at 301 Mulock Drive, in Newmarket, will be opened on Monday, March 16.

Area Manager Michael Crompton, P. Eng., said that some 90 staff members presently located at Sutton Area office and Richmond Hill Area office will be transferred to Newmarket headquarters on March 16. On that date the two above mentioned Area offices will be closed. Customers desiring to contact the Newmarket Area office may do so by phoning 895-8605, he said.

Newmarket was chosen as the locale for the area headquarters since it is a more central place for operating the new area. The formation of this area by merging Sutton

Area and Richmond Hill Area was announced in 1968 by Ontario Hydro in the interest of greater economy, while maintaining the same standards of efficiency.

An attractive headquarters, the Newmarket Area office is a low profile, single storey building constructed of solid masonry with grey brick facing. The new office is heated and air conditioned electrically. It provides 15,300 square feet of space for a combined office and service building. It was erected by Model Builders (Aurora) Limited. Situated on Mulock Drive about a mile east of Yonge Street and close to Don Mills Road, the new office provides excellent access for serving Ontario Hydro customers in the area.

Honor Pickering Ayrshire breeder

An honorary Life Membership has been conferred on Harry W. Boyes of Pickering Township by the Canadian Ayrshire Breeders Association. Mr. Boyes has been breeding Ayrshires in the township for more than 30 years. He has played an active part in the association, serving as director for a number of years and as president in 1955. He has also been prominent in committee work and served on the C.N.R. and Royal Winter Fair Boards.

Mr. Wm. G. Reid is the present local director on the Ayrshire Association Board.

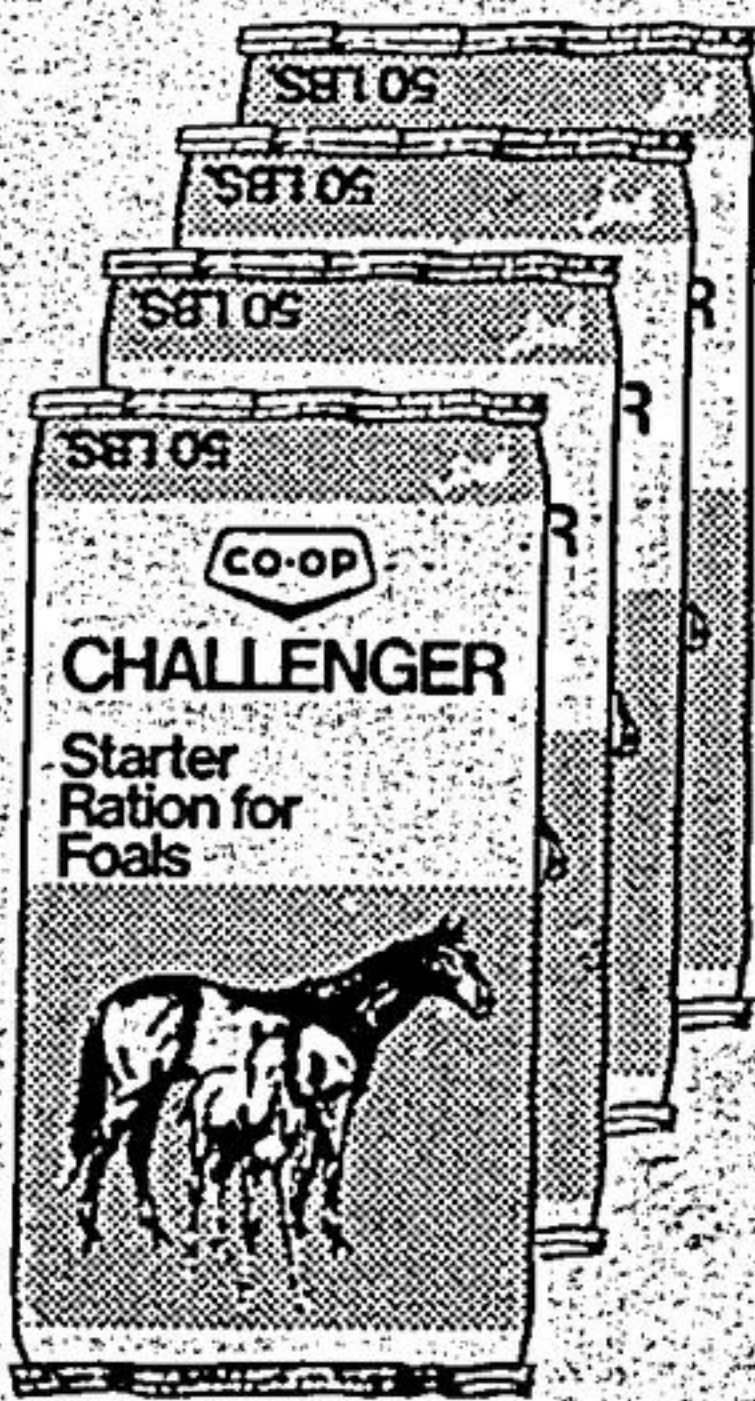

Woman, accompanied by husband and six children, broken up if it weren't for marriage counsellor: the children. My husband won't take them and I won't take them."

YOUR FORAGE NEEDS ARE **DIFFERENT**

No one else has exactly the same forage needs: soils differ from farm to farm; climate and rainfall are never exactly the same and no two herds have identical requirements.

That's why your Co-operative now offers you a wide selection of varieties for pure stands of hay and pasture or a prescription mixture to meet the specific needs of your farm.

See your Co-operative Crop Specialist about your requirements. Discuss with him your particular hay and pasture needs . . . acreage, type of soil, drainage, size of herd etc. Using Department of Agri-

culture recommendations as a basis, he will prescribe named varieties for pure stands, or a seed mixture blended with prescription accuracy in the CO-OP* Seed Mixer. *Registered Trade Mark
