Ontario. Is there any place you'd rather be?

Ontarians are the kind of people who wouldn't be here if there was any place better. We are people who came from a hundred lands and stayed to build. People with backbone and brawn and a hunger to succeed. Men and women who've created a standard of living in decades that other lands worked centuries to build. If we have a flaw it's our chronic modesty. Ontarians may be proud to be Ontarians and Canadians... they just seldom tell anyone. From an economic point of view that's wrong. The more people we have boosting Ontario and Canada the better it is. And we've got a lot to boost with. In the fight against pollution for example, Ontario has become a world leader. Everyone talks about pollution, we do something. More than a billion dollars has been invested to date to build water supply and sewage systems in dozens of communities throughout the province. We've got laws to prosecute industries that pollute the air and water; loans and grants to help industries that want to do something to stop it. We need a vigorous economy of course, to support these important programs. And, that's where you come in. Though our productivity has doubled in ten years and our incomes in twelve, Ontarians don't sit on their successes. There's a demanding decade ahead full of challenges and opportunities to make the quality of our lives better yet. To meet these challenges we've got to believe in ourselves. Which, when you think about it, isn't such a bad idea.

Everytime you boost Ontario... Ontario and Canada get a little stronger.
 Government of Ontario John Roberts, Prime Minister.
