Spademan Co. wins garbage contract

MARKHAM — Ralph Spademan Limited has been awarded the contract for garbage pickup in the Town of Markham for one year, at a tendered price of \$141,330.00.

Acceptance of the figure, the lowest of five submitted, was agreed by Council, Tuesday night. Several recommendations, however, as put forward by the Engineer, will be discussed.

Two garbage areas have been established, one including Markham and Unionville, and the other taking in the community of Thornhill. Mr. Spademan assured members he had the equipment to do the job. The number of pickups may vary per week, depending on the area and season of the year.

The Spademan firm will receive an additional \$4,732.00 for trash collections as required by the municipality.

It was pointed out that Mr. Spademan's bid was over \$20,000 less than the next lowest received.

Organize 4-H Clubs in York

District meetings are well attended

R. E. Wightman
Associate Agricultural Representative for York Region

4-H Clubs were organized in York County last week, with good numbers attending all meetings. Our young people perhaps show the way for all of us with the enthusiastic planning that went on at these meetings, and will continue from now until September.

The unique point of a 4-H Club is that every member carries out his own project during the 4-H season. The choice of projects is very wide — a beef or dairy calf, a horse, pigs or sheep, a field of grain, an acre of corn or anything that would make an interesting project. Members still get together about five times during the summer though, and learn new ideas about their own and other projects. It's a good opportunity to meet new friends and take part in special activities planned on a county or provincial basis.

Any boys and girls over twelve years can still join 4-H. Just call or drop into the Agricultural office at Newmarket and we would be pleased to give you the details, or better yet, get in touch with any of the 4-H leaders in your community.
