York Region traffic survey

YORK REGION — During the last weekend of July and on two weekends in August, the Regional Municipality of York and the Ontario Ministry of Transportation and Communications are jointly conducting a traffic survey along major north-south roads leading to the south shore of Lake Simcoe. A sample of drivers passing each survey station are

required to stop for a short time and answer a few simple questions concerning their trip. The information obtained will provide a better understanding of the travel characteristics of those making recreational trips to and from the south shore of Lake Simcoe and help to identify existing or potential transportation problems for such trip-makers.
