

# "Chic" classics

New! Exciting! Fashions that dare to flatter today's women. After floundering through the past seasons in a slap happy, do-your-own-thing dressing, women once again want to look like women, chic and sophisticated. Even the devotees of the "jean" scene are putting their dollars in the chic classics.

Dominating the Holiday Season, you will make an entrance in fluid, soft and femininely spellbinding gowns that flow over the body.

Ostrich, feathers, beads, sequins and malabou trim this year's gown, also hip length jackets in flowing polyester crepes and sheers, many with malibou and sequined trimmed hoods.

Angelic whites, vibrant bold colours and floral prints abound.

Separates are also very popular in the latest shades of candle and moonbeam, that conjure up images of childhood

fantasies. Deep, lush pile velours, and polyester knits with the space-dyed effect are shown in long skirts, tailored, and also bomber jackets.

In summing up this year's fashion scene, it is very soft, feminine, shimmering, sparkling and thoroughly delightful to the masculine eye.
