

Airport inquiry commission report

STOUFFVILLE — The Tribune last week had an opportunity to examine the Inquiry Commission report into the Pickering Airport and the following are excerpts from the report that pertain to the Stouffville area.

The sections relevant to Stouffville are in two separate parts of the Gibson Commission report. Quotes are —

"It is difficult to apply the NEF system in a rural area where the background or ambient noise level is low. Under such circumstances, the noise emitted by aircraft would be noticed as a major noise intrusion to people living in such a community."

"Two different witnesses, one called on behalf of the Ministry of Transport and one called on behalf of the Town of Whitchurch - Stouffville gave conflicting evidence as to the level of background noise in these communities."

The commission gave two reasons for accepting the town's evidence - 1) the study was done, away from the main arteries of transportation and the main points of sound concentration," while the ministry's were

in a much more urbanized community where one would expect a greater ambient noise level from many competing noises and sounds.

"The commission does not, in case of the proposed Pickering Airport, accept the 28-30 NEF line as an acceptable level of tolerance in a community accustomed historically to a low level of background noise."

"But it (the commission) is of the opinion that a 28 or 30 NEF level is not an appropriate level to apply in the case of the Pickering Airport and it is dangerous to regard such contours as absolutes."

"The commission has noted that the 28 NEF contour is too close to Clarendon and Stouffville and perhaps some areas of the Town of Markham... the commission also noted that the level of noise represented by a 28 or 30 NEF contour can be regarded as a level of noise which will be found tolerable by residents of those said communities who historically have been accustomed to a low level of background noise."

"The commission suggests that the government... should offer to buy the lands of persons in those said communities who have concern in respect of the future use and enjoyment of their lands as a result of future possible disturbance from aircraft operations. Those per-

sons who do in fact sell their lands to the government... should have the right or option, in the contract of sale, to repurchase the lands from the government at any time within six months after the date of sale.

"It is the commission's view that the project should include as a minimum, the expropriation of all land within the 25 NEF zone level or greater in addition to that which it has commented upon concerning Stouffville and Clarendon."
