Spring fashion highlights

The softness of spring arrives with easy breezy good looks as softer lines and casual ideas erase the sharper feeling of past fashion trends in men's and women's clothing. Sportswear is undergoing an evaluation in colour and fabric, the elegant and interchangeable safari suit is sure to be an instant winner this spring. The beautiful 26 inch skirt, full and flaring, the new flowing soft dresses, separates for flexible dressing are the backbone of every wardrobe in fabrics of character that set fashion direction.

Colour co-ordinated polyesters whammo denim outfits. Knitwear separates, slinky acrylic skirts and long dresses for flung designs in T-shirts, pant suits in easy care fabrics, all simplicity and femininity with style and zing.

For today's casual lifestyle, gabardine and polyester pants and skirts and tops in pale pastels of peach, mint, powder blue, dusty pink and off-white along with blouses in pretty florals and nostalgic prints and of course, the zippy safari suit headline fashion this spring.

Fashions we will see this spring reflect the mood of the moment, softer, looser, neater, all in all instant chic, to captivate the woman who demands easy clothes with snappy elegance.

Today's woman is confident and sure

enough to her sense of style that she's not afraid to indulge in an occasional flight of fantasy; she has no time for fast fads, she knows, understands and wants quality.

This is Women's Year 1975.

Enjoy it.
