When Shopping For A Pool Beware Of The Following:

- 1 - The Bait and Switch method (being drawn in by misleading advertising of a low priced pool that does not exist, only to be pressured into the purchasing of a more expensive pool.
- 2 - The high pressure salesman who will try to confuse you by making promises that he is not prepared to put on paper, but his offer ends today so you must commit yourself immediately.

Check out all the features of the pool then form your own conclusion.
