Hiway-Byway, our famous snow-tire that makes fun of Winter driving—now offered in 2 great Radial constructions: one with textile belts for cushion comfort, lower price; the other with a steel belt and BPT—a specially compounded tread that provides Big Paw Traction to grip slippery roads almost like studded-tires without added stud-costs. On snow, these Radials give up to 80% more drive-wheel traction than Summer Radials.

Winter Express Polyflex

A terrific combo! Big Paw Traction on top of the popular Polyflex construction: 2 Polyester Belts for strength and mileage plus 2 Nylon plies for safety. Its Big Paw stud-like grip is from a unique blend of natural and synthetic rubber simulating the clutch of a Polar Bear's paws. In the same proven tread design but without Big Paw Traction, Winter Express is available in 2 other constructions: 4-Ply Polyester Whitewall, smooth, non-flat-spotting; and 4-ply Nylon Blackwall for cushioned, extra-safe riding.
