MRC2478 COOKING SIGNAL LIGHT TOUCH CONTROL DOOR BUTTON PUSH TO START BUTTON 42-MINUTE TIMER

The first five minutes of the dial are calibrated in seconds so you can pinpoint precise cooking times for small amounts of food. It covers a full 42 minutes for big cooking jobs. VARIABLE COOK CYCLE: The Solid State Variable Cook Control gives you an important "extra" in preparing food. It enables you to choose the energy level you desire from 65 watts to 675 watts. This allows a "gourmet touch" to custards, souffles and other foods where lower energy levels are desired to enhance flavour and appearance. VARIABLE DEFROST CONTROL: Solid State Variable Defrost gives you complete control of thawing frozen foods. Just dial the Variable Defrost Control to get the best thawing cycle for every type of food from jumbo turkeys to delicate pastries.
