THE WEIGHT CONTROL INSTITUTE believes that:

- One meal plan cannot work for all people and that the requirements of individuals are as varied as the individuals themselves.
- Weight problems are the result of a caloric intake in excess of the individual's basic maintenance level and that there are no magical or mystical solutions.
- Weight problems are not necessarily the result of weak character but could be the result of an inherited body type (ectomorphic, endomorphic or mesomorphic) or the lack of knowledge and information about weight control and you should not feel guilty.
- Interesting and varied diets have been developed to suit the life styles of individuals and include such things as brownies, ice cream and beer. You do not have to change your life style or go hungry to lose weight.
- Weight control is a predictable science and not an art, and as a result all individuals have the ability to learn how to control their own weight and do not have to cut corners to be successful.
- People must be treated with respect and only require knowledge, information and positive reinforcement to achieve their targets.

YOU ARE INVITED TO ATTEND ANY OF THE WEEKLY MEETINGS WITH NO OBLIGATION TO HEAR ABOUT THE WEIGHT CONTROL INSTITUTE'S FIVE PART PROGRAM ON WEIGHT CONTROL.
