Great

Glide-Air RADIALS

Belted Radial Performance at a Budget Price!

A super tire with all the excellent features for which radials are noted; long mileage, great wet and dry traction, sure-footed stops and starts plus superb cornering and steering. Built with 2 Glass belts encircling a Polyester casing—a construction now common in many new-car radials to offer significant weight reduction and smoother low-speed ride without compromising radial performance. Metric sizes are of a slightly different construction.

Whitewall available at \$2.00 extra

A strong, durable tire similar in design to standard-equipment tires of the late sixties except it's made with 4 plies of Polyester instead of 2. The 4 laminated cross plies of resilient Polyester resist thermal set and provide a soft, easy ride for smooth, vibration-free driving.
