Our Giant Hiway-Byway Glass-Belted Tire is built to make fun of winter driving. 2 rugged plies of DuPont 66 Nylon provide safety (see Nevada Desert Test Results posted in store). Coarse-lugged, self-cleaning tread, reinforced by 2 stabilizing Glass belts, barrels through deep snow and provides a firm grip on icy roads. An outstanding winter performer.

## Radial Snows — 80% more traction than summer radials!

Deep-Traction Winter Express Tires, reinforced with Nylon or Polyester, are supersnows, produced from the same molds. Nylon offers strength at low cost; Polyester eliminates cold-start thump for extra smoothness. Both are equipped with bold, deep-molded, self-cleaning lugs to pull through heavy snow and keep a sure foothold on slippery surfaces.

The Winter Express Glass-Belted Radial is a tremendous traction tire for the price! Efficient design with rugged, deep-biting cleats that develop exceptional grip in heavy snow. Built with a Polyester casing, encircled by 2 reinforcing Glass belts, to give as smooth a ride as possible with traction radials.

The Hiway-Byway 70-series Radial is built extra wide to get your muscle car or street van off the mark fast. The extra-wide tread face, with bold self-cleaning cleats, really bites in when winter traction is needed most. Polyester body plies, reinforced by 2 Glass belts, provide a soft, smooth ride. Before installing, check wheel clearance at your Canadian Tire Store.

No Extra Charge for installation of our new passenger tires on most standard rims when you buy a Dill or Schrader valve at our regular price of \$1.00. We must install tire & valve together.
