THERE'S MORE THAN ONE KIND OF HEARING AID.

- 1 THE TTY HEARING AID.**
The TTY is the telephone for the deaf. It passes typewriter messages through the telephone system. It's expensive and it's rare, so very few deaf people have their own phone.
- 2 THE TV HEARING AID.**
This is a subtitle system that can be put on programmes so that only subscribing deaf people can see it. But stations and cable companies in Canada have not made it available. As a result, 1,500,000 Canadians miss some or all TV programming.
- 3 THE OPTICAR HEARING AID.**
This handy machine flashes your lights on and off when the phone rings, the baby cries or the door knocks. It's a necessity for many deaf people, but it's expensive.
- 4 THE HEARING AID HEARING AID.**
Costly to buy, costly to fit and costly to service. There are many types of hearing aids on the market, but some people plain can't afford proper hearing aid care. Helping them is one of the things we do at The Canadian Hearing Society.
- 5 THE DANGER HEARING AID.**
A pocket-size life-saver, this vibrator will open up new fields of employment for 'deaf' people. If a danger alarm goes off in a factory or construction project, the deaf worker will be warned. The Canadian Hearing Society is developing it now.
- 6 YOU.**
You can be a terrific hearing aid by sending us a cheque. We'll use it to help create a better life for 1,500,000 hearing-impaired Canadians. And we'll send you a receipt for income tax purposes (for donations over \$5) and an "I'm a Hearing Aid" sticker.
- 7 THE CORPORATE HEARING AID.**
Every company can be a hearing aid by taking full advantage of the skills of hearing-impaired people. Employers actually rate them higher for productivity. And/or, you can send a corporate donation, to the address below.
- 8 THE FIRE HEARING AID.**
Even though it is recommended that every new house have one, there is no reliable fire alarm system for the deaf. We need more research money to make the world as safe for deaf people as it is for others.
- 9 THE EVERYDAY HEARING AID.**
Your everyday attitude can make a real difference. Be patient and take the time to communicate when you meet someone with a hearing impairment. And guard yourself and your family with regular checks by your doctor and Audiologist.

We're tightening up on people who abuse Unemployment Insurance.

Most people getting unemployment insurance play by the rules. But some people don't seem to know that they can't take a job and collect benefits without telling us they're working. That's why employers are being asked to send us the starting date and Social Insurance Number or extracts from computer payroll tapes for each employee they hire or rehire. This information is cross-checked with the Social Insurance Numbers of people receiving unemployment insurance benefits. Only cases of potential abuse will ever surface.

If you are collecting unemployment insurance benefits, and start a new job, please say so on your UI claimant report card.
