Speaks to students
Tribune Editor Jim Thomas visited Whitchurch - Highlands School, Thursday afternoon and spoke to the students in Grades 3 and 4 concerning the operation and publication of a weekly newspaper.

Problem confirmed

A couple of weeks ago, The Tribune published a story concerning hunters trespassing on private property and discharging guns near a residential area at Bloomington. The complainants asked that their names not be revealed. This act of wanton killing has since been confirmed by another resident north of Bloomington. She said several groups of hunters with dogs had entered their premises, also that of a neighbor. She described how one of the men was quite abusive and the other polite. "It was like a three-ring circus around here for awhile," she said. Police were called. The hunters had killed a wolf and a raccoon, she said, possibly in the same gravel pit that other callers had told about. "This district's getting far too built up for that kind of thing," she stated.

New from YANMAR

EXCLUSIVE!

POWER SHIFT

POWER SHIFT

Yanmar is the only tractor in its class with a Power Shift transmission which replaces the stop, shift, go, stop, shift, to of normal tractor operation with pure go, go, go.

Quite simply, Power Shift is a regular mechanical transmission with hydraulic clutches on each gear. When the shift lever is moved, these hydraulic clutches automatically change into the selected gear, so there's no need to stop and use the foot clutch. Because it's basically a mechanical transmission, power transfer is the same as with regular transmission compared to a 25 to 35% power loss in all hydraulic or hydrostatic transmissions used in garden tractors and competitive tractors. In fact, Power Shift transmissions have been used on large farm tractors satisfactorily throughout the world for years and on Yanmar tractors in Japan and Asia as well.

With Yanmar Power Shift, it's easy to change to a higher or lower gear... simply move the shift lever. Extra power, or more speed, is available at a touch of the lever. Gear up, gear down, even go into reverse, all without clutching. With the 3-speed range transmission you have nine forward and three reverse gears from which to choose to meet every job requirement. The result is an entirely new standard of work efficiency and compact tractor performance... available only in the new Yanmar YM186(D) & YM336(D).

PLUS

LIVE PTO

With a regular PTO, the implement doesn't start working until the tractor starts moving. When mowing, sometimes there's a half-cut spot that has to be gone over again. Or if you're doing heavy work in the field, you have to back up and "take a run" at the work (if you have room).

The Yanmar live PTO eliminates all this. The PTO is engaged before the P/S transmission; the implement starts working before the tractor starts moving. This 2-speed (540 and 1,000 rpm) live PTO is another Yanmar exclusive that means faster, more efficient work for you.
