(Legion goals: C.Tymon, D.Gornall, J.Kerr)

Aurora 5 - Stouffville Scotia Bank 3  
(Scotia goals: C.Berardi, M.Jensen, J.Baggis)

## Kiss an old flame goodbye.

We'd like you to take a minute now to think about something you'd really rather not think about. Home heating. Because right now is the perfect time to do something about next winter's oil bills.

If your oil furnace is in good condition, but you'd like it to run more economically, electricity is the answer. A dual-energy system combining oil and electricity will heat your home efficiently and economically.

For example, adding an electric plenum heater to your oil furnace will reduce the amount of oil you use by up to 75 per cent. While adding a heat pump will not only cut heating bills by 20 to 30 per cent, but also provide air conditioning in the summer, for efficient year-round comfort.

If your furnace does need replacing, an electric furnace or one of the other electric systems can heat your home cleanly, efficiently and economically.

Like to know more? Take a minute now and write to Ontario Hydro, Room U7 E1, 700 University Avenue, Toronto M5G 1X6 and ask for our free booklet "Electric Heating Options for Your Home."

Because the minute you take now could add up to big savings come December.

Go Electric
