RRSP Rate Shopping 36.2%*

Compare the interest rate you earned on your last year's RRSP to the rate chart below.

If you had invested in a GIC (Guaranteed Investment Certificate) last year, you probably would have invested your money around 11%. If you had invested your money in Bolton Tremblay's Canada Cumulative Fund, you would have earned 36.2% in 1 year and an average of 19.9% per year over five years.

You owe it to yourself to get the best possible rate to work for you.

Is your money working in your best interest? You decide!

	GIC		Canada Cumulative Fund	
	Annual Compound Rate	Value of $1000 Invested	Annual Compound Rate	Value of $1000 Invested
1 Year	11.25%	$1,125	36.2%*	$1,362
5 Years	11.61%	$1,732	19.9%	$2,480
10 Years	10.81%	$2,709	17.4%	$4,986

*If you had invested your RRSP in Bolton Tremblay's Canada Cumulative Fund on December 31, 1982, your investment would have grown 36.2%, 12 months later.

Of course, past performance is no guarantee of future results. It is, however, an important factor to consider when deciding upon how to make your money grow.

If you have already purchased your 1983 RRSP, it is to your advantage to be planning your 1984 contribution NOW.

For more information on how you can make your RRSPs and other investments work for you, or if you require information on financial planning, just fill out and mail the coupon below or simply call:
