GIFT CERTIFICATES FOR YOUR VALENTINE

THE PONY LOVES CANADA. EVEN WINTER.

Long before the first Pony was sold in this country, a whole fleet of Ponys headed north for winter testing in Kapuskasing, Ontario. The purpose: to fine-tune the Pony for Canadian driving conditions. The Ponys slept outdoors that winter. Each day, they

went through their paces under the toughest imaginable conditions, battling snow and ice and bone-chilling temperatures. When the winter was over, the engineers with their calculators and clipboards, made a few changes. That's why Michelin all-season, steel-belted radial tires are standard equipment. The suspension set up has been adjusted for Canadian conditions. An extra coat of factory-installed rustproofing protects every Pony coming

to Canada. All of which helps to explain why Ponys are breezing through Maritime storms and Prairie blizzards—through hail, wind, snow, sleet and freezing temperatures. So much performance for such a modest investment. The new '85 Pony is a proven veteran with a host of standard features. And it still uses regular gasoline. The penny-pinching kind. All in all, it's not surprising that Pony is the most successful import ever introduced in Canada. Discover for yourself what all the fuss is about.
