

## Visitors should be welcomed

Dear Mr Thomas:

Ever since we moved to Stouffville, (from Elmira), we've heard nothing but complaints concerning traffic travelling to and from the Stouffville Flea Market.

We find it all very amusing. Every morning, commuters line up bumper-to-bumper on Hwys. 401 and 404. They line up on Fleet Street going to see the Maple Leafs' play. Undoubtedly, some have lined up, getting to the Farmers' Market in Kitchener.

I'm beginning to wonder if it's inconvenience or jealousy. People in Stouffville should be pleased the Market is doing so well and should roll out the welcome mat to 'guests' from the city. Can you imagine what Stouffville would be like on weekends without the Market?

If residents want to live in a cemetery, that's fine. We enjoy the activity the Sales Barn creates. We'll experience the cemetery environment soon enough.

Sincerely,  
Theresa Arnold,  
Ivy Crescent,  
Stouffville

A bridge into Claremont's past

## WINDOW ON WILDLIFE

### Barnyard patrols

BY ART BRIGGS-JUDE

In our move to the country, we never envisioned we would have to bear arms to protect our property and livestock.

Despite the fact I had been brought up in a hunting and trapping environment and spent a good portion of my youth on a farm, wild animals were never a serious problem in the Niagara Peninsula.

In that fruit belt area the bountiful pheasant population during those years likely provided the predators with ample food, so that poultry raiding was the exception rather than the rule. Apart from some early spring crow and groundhog shooting, our hunting then was confined to the cooler weather months.

You can well imagine our surprise and disbelief when we found ourselves competing in many ways with the furry creatures. Skunks digging up the seed beds, groundhogs nipping off the greens, porcupines crunching everything from garden fare to barn beams and as a sideline trying to convert our dogs and cattle's noses into instant pin cushions.

Then too the chipmunks especially liked our tomatoes and melons, and the raccoons seemed to have advanced notice as to the ripening corn.

To add to our summer fun, the coyotes and foxes liked our brand of chicken and turkey so well, we had to increase our quota just to meet their demands. But while we never knew for sure how many of our domestic birds the coyotes got, the foxes came boldly into the barnyard to choose their chicken to go.

Despite our watchful patrols, we lost seven gobblers last fall to these brushtailed predators. At 14 pounds apiece, it was no small loss. Add to this total, chickens guinea fowl and the odd duck and you begin to grasp the magnitude of our dilemma.

The frustrating part of all this was that all the poultry were closed in at night and these big tom attacks took place in broad daylight. Sure, we could have locked every last feather bearer in pens and cages round the clock, but then they would turn out like all the rest of the flavor-forced fowl you buy.

The frustrating part of all this was that all the poultry were closed in at night and these big tom attacks took place in broad daylight. Sure, we could have locked every last feather bearer in pens and cages round the clock, but then they would turn out like all the rest of the flavor-forced fowl you buy.
