Business sense

Money should work for you

What can you do with a dollar? You can still do only three things with it — spend, loan or own. If you spend it, it is a memory. But if you want your dollar to grow, you have two options.

If you loan your money you will receive rental payments, called interest, in return. Interest is good for the average person. But it is when you own with your money that you become part of that group of people who have more money to spend later, because they have made more money as they went along. Most people are satisfied with earning interest that may or may not keep up with inflation. By the time they pay tax on their earnings they are usually behind. Savings like guaranteed investment certificates, term deposits and Canada Savings Bonds are common, but fail to grow enough to help you really get ahead.

You have a limited amount of time to make money. If you wish to be successful with your money, you must do something different. There are many investment opportunities that have provided results that people think only the experts can get.

That is the key to an approach. Get in touch with the experts who make the choices that will give you a rate of return that will make your neighbors shake their heads in disbelief.

What would you think of someone who averaged 24 per cent on a year on his investments? There

are investments that have provided that rate of return for 10 years.

And now you can earn this money in the form of capital gains tax-free up to \$500,000 in your lifetime. You can be the talk of your family and friends with these returns on your investments. Or you can just have confident smile, knowing that your money is working hard for you.

If you wish to be average in your earning power, professionals can't help you. The banks, insurance companies and trust companies are there to help you to be average. But if you wish to get these exceptional results, go to professional investment councilors.

You are good at what you do because you know what you are doing. Often people who are expert in their field struggle with investing their money. Wealthy people have recognized this for years and have looked to financial experts to help them invest their inheritances or new money.

Seek out professional investment counsellors who supervise and invest money. It is possible for you to experience the same kind of financial growth to which the wealthy have been accustomed.

By transferring your money from the bank or savings bonds into professionally managed investment funds, you have freed your money to work for you rather than for the bank.

Confused about which RRSP is right for you?

Ask Standard Trust about a

FLEXPLAN RRSP

Tax benefits today... while you take advantage of a better rate tomorrow.

Right now, many financial institutions are advertising RRSPs — all offering pretty much the same rate of interest.

But that's today's rate.

What happens if interest rates go up after March 1 — and your money is tied up at today's rate? You've lost out on that extra interest.

Not if you open a Standard Trust Retirement Savings Account — the FLEXPLAN RRSP. Your money isn't locked in. It earns current interest rates each day the same as any savings account. Then, when interest rates go up, you can convert your FLEXPLAN RRSP into a Standard Trust GIC RRSP — investing your money for up to five years at a much higher rate of interest. To make your money make the most for you, at the best time.

So, don't just automatically buy an RRSP where you do your banking. Shop around. And make sure Standard Trust is on your shopping list.

And compare these other Standard Trust standard features:

NO FEES

Absolutely no administration, acquisition or redemption fees.

APPLY BY PHONE

Avoid last-minute line-ups. We do all the paperwork. You just come in and sign.

INSTANT TAX RECEIPT

You get your tax receipt the same day you sign, so you can file your return the same day.
