Announcing the most dramatic advance in home dental care since the invention of the toothbrush

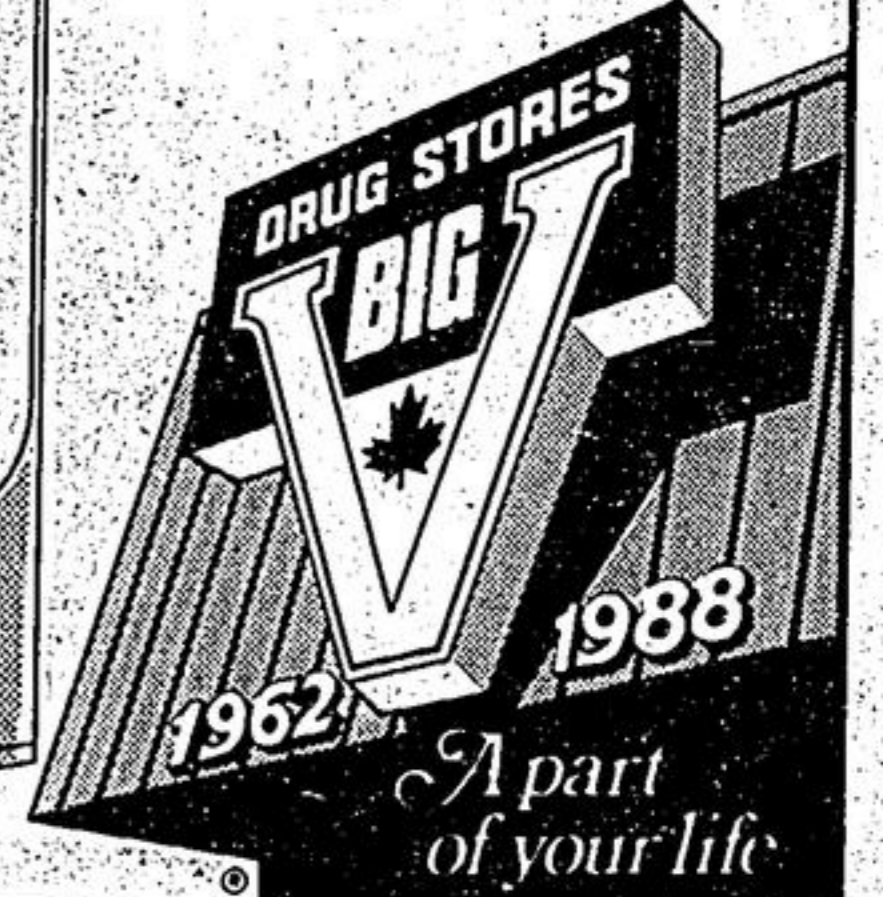

Manual brushing removes less than half the plaque buildup that can lead to gum disease. But the new INTERPLAK[®] Home Plaque Removal Instrument cleans teeth virtually plaque-free. That's because INTERPLAK has ten tufts of bristles that rotate 4,200 times a minute, scouring off plaque and stimulating your gums. Yet the bristles are four times softer than the softest toothbrush.

Each cordless INTERPLAK comes with two interchangeable heads. Plus, you can buy more heads to help every family member fight plaque.
