

# Ready, willing and able We're 'operational'

A full spectrum of obstetrical and gynecological services will be offered at our hospital. During a simulated birth in the delivery room are from the left, Dr. H. Fazal Chief of Pediatrics, Paula Cooke, RN and Elizabeth Lalings, Respiratory Therapist. On the table is "Baby Mattel". The practice took place during Operation Simulation, a program in which volunteers pretended to have various medical problems for several unsuspecting departments.

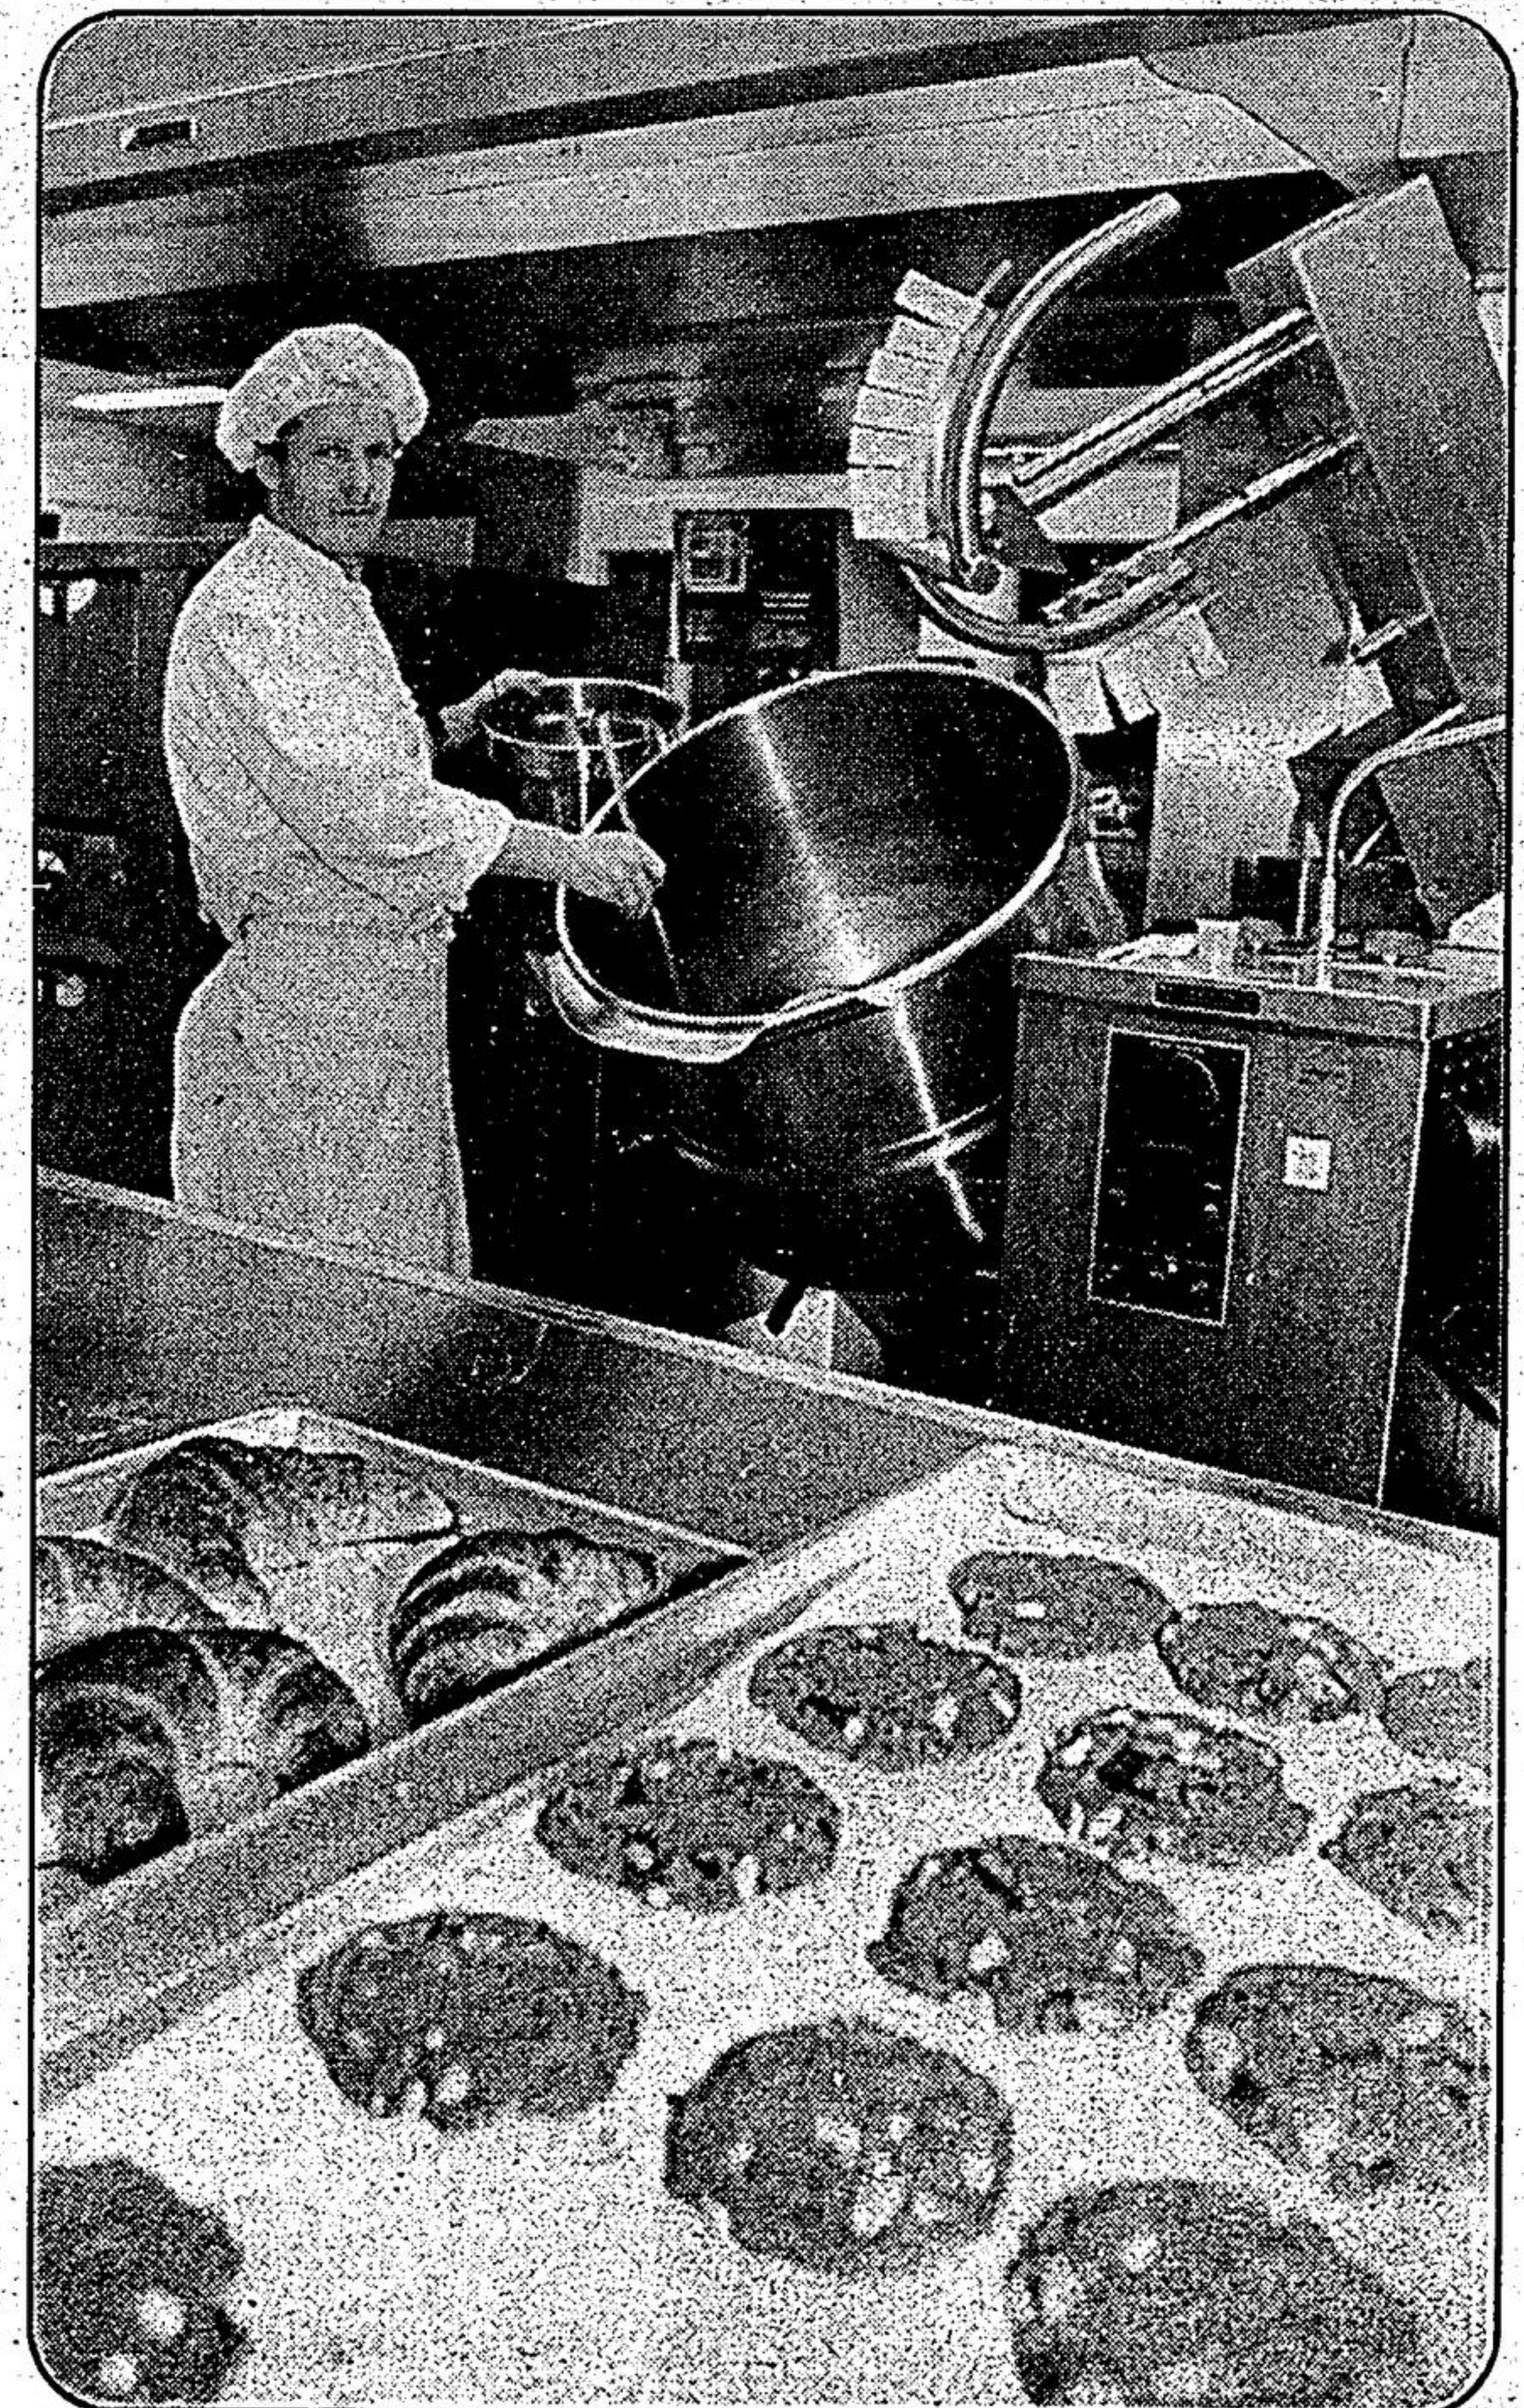

During Operation Simulation, Regional Councillor Ron Moran decked in hair net, was pulled through the CT scanner by Ken Laycock.

Maria Cirocco, RN, Manager of Ambulatory Care, operates the video endoscopy system which allows visual inspection of hollow cavities in the body.
