A drunk driving conviction will send you to jail. It will send you way up. You may lose your driver's license, temporarily or permanently. You will have trouble getting a job with any star on your resume. It is not enough to think about what you are doing. You are responsible for the safety of an innocent person?

Responsibility is the key to a safe environment.

If you chose to drink, drink responsibly. Make sure that you and those around you get home safely. That way you won't end up on these pages.
