TV boosters

Gordon Jessup, treasurer of the Optimist Club presents \$250 to Mary-Anne Pearce, activity director at Green Gables Nursing Home. The money will go towards a big screen TV for residents.

The Regional Municipality of Durham Works Department

APPLICATION FOR RESIDENTIAL WATER FIXTURE REPLACEMENT PROGRAM

in the Communities of Port Perry / Prince Albert, Uxbridge and Beaverton

Durham Region is offering an incentive program for residential homeowners in the above noted communities to replace toilets, showerheads and faucet aerators with water efficient fixtures. This program will provide 50% funding assistance to the eligible households towards the cost of fixture replacement. To be eligible to apply for funding assistance, your home must have a connection to the Regional water supply system in Port Perry / Prince Albert, Uxbridge or Beaverton, and have an individual water meter.

Under this program, replacement of at least one toilet per household is mandatory. The toilets to be used for this program will be Ultra Low Flush (6 litre/flush) toilets. Removal of old fixtures and installation of new fixtures will be carried out by a Regional Contractor. With water fixtures replaced under this program, homeowners are expected to have substantial savings in water and sewer charges and energy cost.

More detailed information of the program and Application Forms are available at your local Township Office in Port Perry, Uxbridge or Beaverton. Interested homeowners are requested to fill out the Application Form and return it to your Township Office as early as possible. Due to the limited amount of grant funding available, this program can be offered to only about 10% of existing homes in each community.
