## Coming Soon... Inside Information on Energy Efficiency

If you're looking for a new appliance, look for the new EnerGuide label. You'll find it on every new refrigerator, freezer, clothes washer, dryer, range or dishwasher, sold in Canada.

The new EnerGuide label shows the typical amount of energy an appliance will use in one year. By looking at the label, you can compare the energy consumption of one appliance to others with similar features.

The lower the number, the more energy-efficient the appliance. It's that simple.

Choosing an energy-efficient model today can add up to a lot of savings over the lifetime of the appliance.

So become energy wise. You'll save money and help the environment at the same time.

It pays to read the new **ENERGUIDE** label.
