## BORÉAL

## YOUR NEIGHBOURS KNOW US!

The all PVC Boreal System includes bay, bow, double-hung, awning, casement windows and horizontal sliders.

### IMPECCABLE STYLE FROM THE LAND OF BORÉAL

Magnificent yet demanding. This is the Land of Boreal. This is also a land of spectacular beauty and freedom.

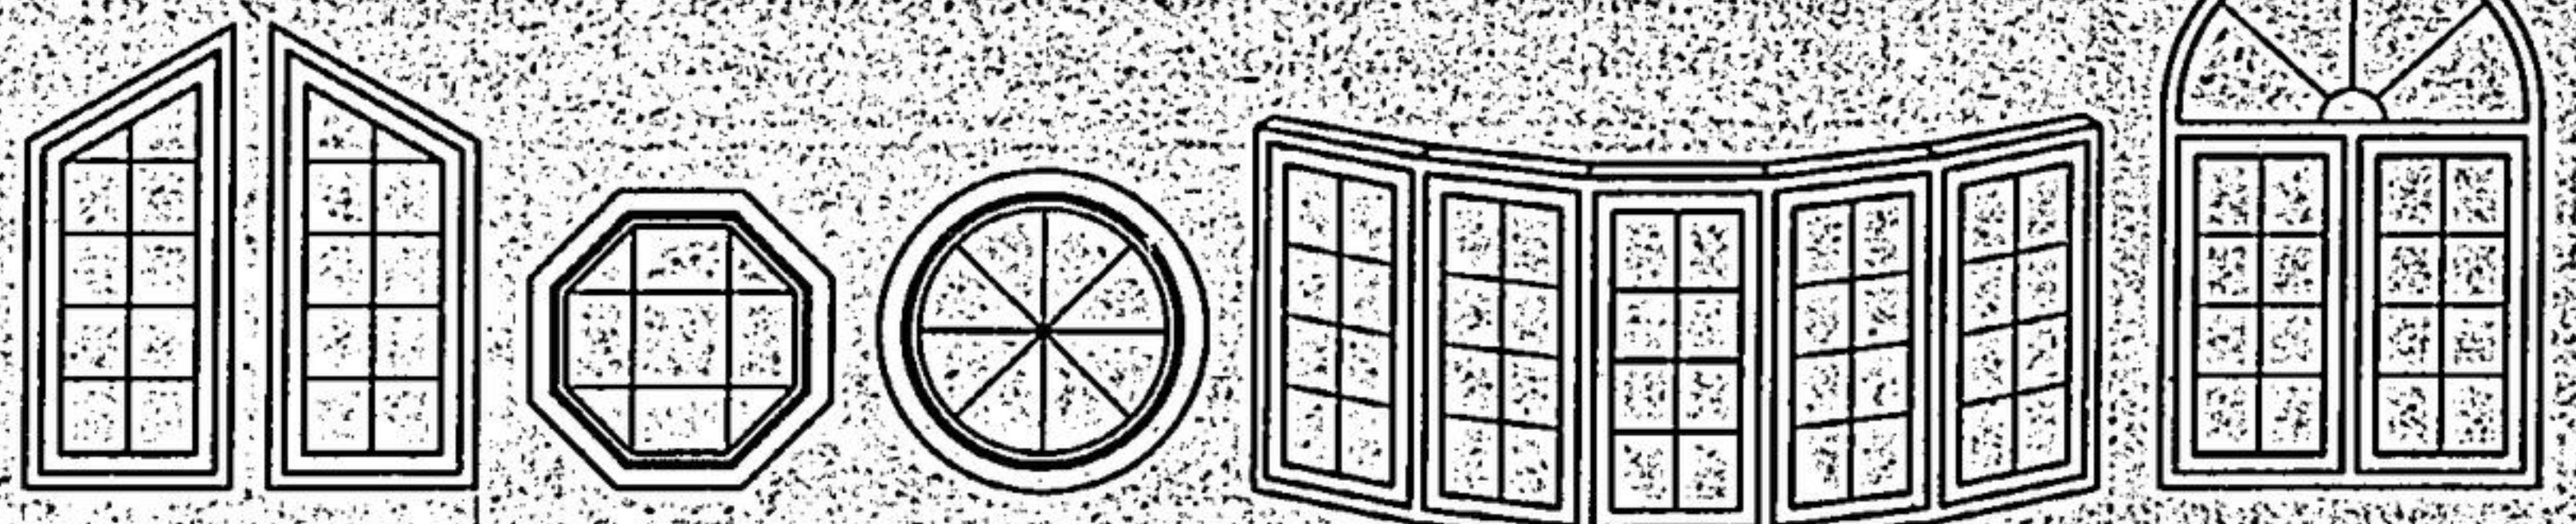

Here, the inspiration for ten years of research and development by P.H.-Tech, a world leader in PVC technology, dedicated to creating the ultimate window system.

The classic beauty of Boreal windows works in harmony to fit any style of home.

The Boreal System allows you to mix and match all kinds of windows: casement, awning, double-hung, sliders and fixed frame.

Better still, special angled and curved designs adapt perfectly to the basic components so that virtually any type of window can be created.

Truly, the only limit to the Boreal System is your imagination!
