500 scientific research studies show TM to be the most effective technique of self-development available in the world today. Find out why.

Maharshi Mahesh Yogi who introduced Transcendental Meditation 37 years ago and brought enlightenment to millions of people in the world is now introducing total knowledge of Natural Law for everyone to spontaneously think and act according to Natural Law so that Natural Law is not violated by anyone, and no one creates the ground for suffering in life. Maharshi's Vedic Science and Technology, the science and technology of consciousness, develops the full creative genius of everyone, promotes perfect health of the individual and collective health of the nation and introduces automation in administration for stress free, problem-free management.
