 Fine Rustic Furnishings

Welcome to the warmth and charm of Rustique de Mexico, offering rustic furniture unparalleled in its beauty, variety and quality. The process begins in our factory located in a small community in southern Mexico. There, craftsmen build each piece of furniture by hand following the original style of Spanish colonial designs.

They start with distressed wormwood that is meticulously salvaged from old disassembled buildings. Each piece ranges in age from 50 to 250 years. These recycled pieces create the one of a kind appeal found in all of Rustique de Mexico's designs. New kiln dried pine wood is then used for the framing and structural components of the furniture. After construction, each piece of furniture is hand waxed and accented with hand forged wrought iron hardware.
