**TORCAN CHEMICAL LTD.**  
"Here We Grow Again"

Torcan is a research, development and manufacturing organization, located approximately 35 minutes north of downtown Toronto. We specialize in pharmaceutical substances and over the past 15 years we have earned industry wide recognition for our process innovation and clinical and commercial applications for our quality products. Our continuous growth is reflected in the following available positions:

**ANALYTICAL CHEMIST**  
Working within a laboratory environment and utilizing state-of-the-art facilities and equipment, you will develop and validate analytical methods for in-process checks, as well as intermediate and final products. You must possess a strong knowledge of HPLC and GC instrumentation and exhibit excellent verbal and written communication. This position reports to the Group Leader Analytical Services and requires you to work on a rotating shift. This is an exceptional opportunity for someone with experience in analytical instrumentation and has a B.Sc. or M.Sc. degree.

**PROCESS/PROJECT ENGINEER**  
As a member of the engineering team, you will lead small and mid-size capital projects in both chemical manufacturing and laboratory environments, from design, project planning, procurement, construction supervision, validation and start-up. You will also provide process trouble-shooting and process design support to the manufacturing areas and provide engineering support to other project engineers and have the ability to manage staff. The candidate will also be responsible for preparing Standard Operating Procedures and Validation Protocols. This position reports to the Manager, Technical Operations and would ideally suit a chemical or mechanical engineer with at least two years experience.

**PILOT PLANT OPERATOR**  
The incumbent will be part of the pilot plant team, processing batches derived from scale-up complex, synthetic organic chemical processes, placing particular expertise on cGMP and following Standard Operating Procedures along with a strong emphasis on all safety aspects incurred within this environment. You must also bring with you the flexibility of working three (3) shifts; a team attitude; attention to the finer details required to work in a chemical environment, beginning with cleaning of the reactors to the end of the batch process. This position reports to the Pilot Plant Supervisor and would ideally suit someone with a process manufacturing background, not necessarily in chemicals but whose strength is in "detail".

**AUTO CAD "CONTRACT POSITION"**  
The incumbent will have at least five years experience. You will be responsible for updating existing and creation of new drawings, reporting to the Manager, Technical Operations.

Torcan's comprehensive benefits program and competitive salary, reflect the value we place on our people. Should you have the qualifications for any of the above positions, please submit your resume to: Torcan Chemical Ltd., 110 Industrial Parkway North, Aurora, Ontario L4G 3H4 or Fax: 905-727-7545 stating which position you are applying for to the attention of Human Resources.
