

## Ask the Professional

**Q: When should I get my tires checked?**

**A:** Obviously, if you feel you are having a problem with your tires slipping, sliding, or bumping. The only contact between your car and the road is your tires. They support the weight of the vehicles, transmit the power of the engine, and assist steering, traction, braking and suspension.

Not respecting adequate tire pressures is to risk losing a significant portion of the benefits tires offer (comfort, durability and safety) and to expose the tires to irreparable damage. Maintenance should also include regularly rotating tires to achieve more uniform wear for all tires on a vehicle. Being a FULL SERVICE centre, we would be pleased to have you come in and we will check your tires FREE of charge. We will also inspect your brakes, front end, and steering components at NO EXTRA CHARGE. Our service at Active Green & Ross is based on our reputation in the community, we are here to provide you with the best full service automotive care.

**Q: Why do I need a will and why should I have a lawyer write it?**

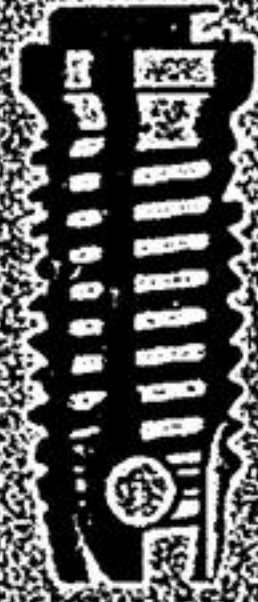

**A:** Wills should be included in basic financial planning but are often ignored by clients. Although people concentrate on minimizing their taxes while alive, few turn their minds to maximizing their estates upon death.

If you die without having a will there are laws which decide to whom your property is distributed and who shall care for your children, if they were, at the time of your death, still in your custody. Even if you have made your wishes known to your family and friends, in regards to these issues, they will not be able to honour your wishes unless they are included in your will.

**A lawyer should draft your will as in order to best protect your interests you must understand, at least, the following:**

- what an executor is;
- who you are legally obligated to support;
- the nature of your assets and which of your assets would be included in your estate on your death;
- how to appoint a guardian for your children;
- how the Family Law Act can affect your will;
- how to minimize your tax liability on your death; and
- how you can ensure that any monies given to any of your beneficiaries does not have to be divided with their spouses if they separate.

**472-2091**

**Q: What are dental implants?**

**A:** Very simply, an implant is an artificial tooth root. Made of titanium, implants have the quality of being so compatible with living tissue that when they are placed in the jaw, the bone will grow onto the surface of the implant. In this way they become anchored in the jaw and can then be used as support for crowns and bridges.

If you are missing one, many or even all of your teeth, dental implants can be used to replace them permanently.

For a free consultation to determine how you can benefit from dental implants contact us.

# OPP plan to combat road rage

The OPP Highway Rangers are launching the second stage of their efforts to put road rage "back in neutral."

A media conference was held Tuesday morning to introduce a new approach for police addressing drivers experiencing Road Rage.

An "Intervention Tool", developed by the OPP in conjunction with the Addiction Research Foundation, has been produced in the form of a "Test Your Road Rage" card for motorists demonstrating aggressive driving habits reflecting Road Rage. A "Road Rage Intervention" may result in a roadside counseling session with an OPP Highway Ranger

providing a driver with the opportunity to determine their Road Rage Score via the Test Your Road Rage card. The "Test Your Road Rage" cards are designed to preserve driver anonymity and will be collected by the OPP Highway Rangers for statistical data and problem analysis purposes. Advice for aggressive drivers and tips for avoiding Road Rage incidents are also on the reverse side of the card.

In addition, the introduction and demonstration of an interactive multi-media computer program facilitating the promotion and collection of Road Rage data by the OPP was also launched at the media conference.
