

Home & Garden

Everyone can install screening

Installing window screening is easy if you follow the tips provided by Bay Mills Canada.

It is easy to install window screening.

1. On large flat surface, use a utility knife or scissors to cut screening at least one inch larger than the frame.
2. With fiberglass screening, take the spline and screen installation tool and carefully roll spline into the groove.
Keep the end of the

roller pointed to the outside edge of the frame.
3. Use a screw driver to tuck the screen and spline into corners.
With aluminum screening, cut a notch in the screen at the

corners to make it easier.
4. Use your utility knife to trim off excess screening.

Put new life in your kitchen.

Let the experts at Guardsman WoodPro® refurbish your kitchen cabinets at a fraction of the cost of refacing or replacing.
