ABERDEEN PLUMBING

Golf Dome at Markham

The Golf Dome at Markham was voted one of the top 100 driving ranges in North America.

This was due, in part, by its excellent year-round facility and qualified teachers.

Designed by former Toronto Maple Leaf prospect Gerard Waslen, The Golf Dome consists of a 53,000 square foot climate-controlled and air-supported dome that has two levels of golfing capabilities.

People can practice their swing on one of two levels. (There are 46 stalls in all. Each stall has a long-fibre mat that helps lessen the impact to the golfers' wrists and elbows.)

There is also a dark blue background to make following the balls path easier. The dome also has a contoured indoor putting green.

In good weather, golfers can practice in one of 75 outdoor stalls and play a game of mini-golf.

Golfers of all ages can take lessons or participate in golf clinics from GPGA professionals. There are also day camps for kids. Waslen said there is a golf package to suit any budget.

The Golf Dome is located at 150 Burncrest Rd. For details call 475-3663.

Aberdeen Plumbing and Mechanical Inc.

Over the last five years, Aberdeen Plumbing and Mechanical Inc. has had tremendous success in the industrial community and is now bringing their expertise and knowledge to home owners.

Located in Markham, Aberdeen specializes in custom installations, renovations and rough-in work.

Owner Doug Seed and his staff's attention to detail and prompt, courteous service has created a solid clientele base in the industrial industry.

"We want to provide that same service to the residents of Markham, ensuring customer satisfaction through competitive

prices and solid workmanship," said Seed. "Whether you have a dripping faucet or wish to design a new basement washroom, you can be assured your needs will be fulfilled."

Aberdeen recently acquired a dealership with a company specializing in two revolutionary new products. For the residential client there is the hydronic temperature balancing valve which simply means, when installed it will eliminate excessive hot water flow in showers, when cold water supplies have been compromised.

For details regarding sales, service or free estimates, call 905-294-8848 or 416-984-1107.
