505 careers

Sunwell Technologies Inc., a small growing manufacturer of industrial
ice generation systems has a requirement for a full time**SR. PROJECT ENGINEER/MANAGER**This is a hands-on senior position in a small engineering department of
2 people, entailing a wide range of duties and responsibilities including
directing both product engineering and project engineering.Responsibilities include developing and implementing a master BOM
system for all standard products and systems, pump and valve selection
systems and master BOM's, drawing filing systems, and other engineering
systems.This person will also be responsible for taking projects as entered from
application engineering, develop BOM's and write PLC programs to
control the systems.This position will require process engineering experience, ideally in the
fish or food processing markets, as well as product/system design
experience. Selection and specification of electric power and control system
components is also required.
