Located in the heart of Unionville, the Blacksmith's Bistro opened its doors in 1995. Upon extensive renovations, workers discovered a collection of Blacksmith's tools in the basement, hence the name was chosen. The Bistro features an excellent combination of seafood and pasta prepared in its open kitchen. There is also a delightful oyster bar where oysters are shucked in front of you. Adding to the atmosphere is Jazz Night every Sunday evening.

In the summer months it is hosted on the rear patio and moves inside when the colder weather sets in. Special events are frequent, with wine tasting and cigar nights being some of the most popular.

A new addition named the Greyhouse has recently joined the Bistro. The house is separate from the main Bistro and is available for conferences, parties and special events. Due to demand, the Greyhouse offers catering services for events large or small. Just call and our catering manager will be pleased to work out the event to the last detail with you.
