THAT HAD TO HURT

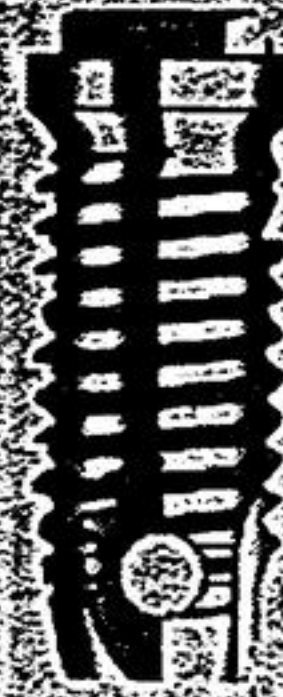

This home on Valleycrest Drive in Markham stopped traffic with its Halloween decoration of a witch in a tree. The display prompted lots of attention and chuckles from passers-by. All residents are reminded that today is Halloween and extra caution should be taken while driving as lots of youngsters will out-trick-or-treat this evening.

Q: What are dental implants?

A: Very simply, an implant is an artificial tooth root. Made of titanium, implants have the quality of being so compatible with living tissue that when they are placed in the jaw, the bone will grow onto the surface of the implant. In this way they become anchored in the jaw and can then be used as support for crowns and bridges.

If you are missing one, many, or even all of your teeth, dental implants can be used to replace them *permanently*.

Q: I think I may be too old to have implant treatment. Is there an age limit?

A: Age is not an obstacle to having implant treatment. There are some medical reasons not to have implants, and these can be reviewed by your dentist.
