Used vehicle clearance centre offers value and selection

BY LISA CARTWRIGHT
FEATURES WRITER

Longman's Markham Chrysler Used Vehicle Clearance Centre offers value and selection.

"We felt that the used car market in Markham hadn't really been developed," said Steven Longman, of Longman's Markham Chrysler.

"With our reputation, ... and with Markham Jeep Eagle moving to its new location, we felt it was the perfect opportunity to focus on supplying residents with a full-service used vehicle centre," he said.

The Clearance Centre, located on Hwy. 48 north of 16th Avenue, offers a large selection of quality, preowned cars, trucks, sports utilities, 4x4s and pickup trucks in every make and model.

People trading in their vehicle will receive top dollar for their used car, while people purchasing a new vehicle at the clearance centre will also receive a quality car at an excellent price.

"Everybody knows someone who has had a bad experience buying a used car," said Longman. "We offer a better experience, a good experience."

Every car that comes into the clearance centre goes through a full inspection as well as a history check before being resold.

In addition to quality vehicles, the sales people – including Nick Doukas and Phil Harris – are knowledgeable about the vehicles, have years of experience in the car industry and are able to answer any questions and concerns.

"Markham Chrysler's commitment to customer satisfaction shines through at the used car centre."

The centre also offers numerous lease options and the best lease rates available.

For details call 471-4505.

Free vehicle scan

With a donation to the Children's Wish Foundation, TASC Limited will see if your vehicle is aligned properly

Arrive alive!

With this in mind, TASC Limited – a company that has created a three dimensional scanner that checks a vehicle's alignment – is proud to provide a free vehicle scan.

TASC has arranged with their dealers to offer the public a free scan as an introduction to its new three dimensional technology concept.

TASC technicians will check the unibody of your car to determine if the frame is within industry tolerance, including a point to point line reference print out.

In lieu of the regular charge of $150, the dealers will accept any donations to the Children's Wish Foundation.

Call 1-800-918-9838 for an appointment.

November was an all-time record breaking month for Mercedes-Benz Canada

Following an all-time record breaking month of 1,002 units in October, the Mercedes-Benz Canada dealers delivered a most respectable 937 units November, which represents a substantial increase of 60.4 per cent versus the 538 units retailed in November 1997.

The M-Class vehicles continue to arrive in high numbers at Mercedes-Benz dealerships, which in turn has certainly helped reach this significant sales level in November. Both the 1999 C and E-Class models fared very well this month and we saw an important jump in the deliveries of some of the niche models like the C43, the SLK and the different CLK models.

"Some of the dealerships reported their own record-breaking sales in November and we are happy to state that these kinds of monthly numbers will be a common occurrence in 1999," said Ernst H. Lieb, president of Mercedes-Benz Canada.
