Sophisticated simplicity is key to women's fashions this season

FROM PAGE 16.

BOYS UP TO 14

"It is still very skateboard looking." Cotton, cotton and twills and jeans with cargo pockets, zippers and top stitching treatment are matched by loose t-shirts with cartoon or techno-looking screens. Horizontal stripes are also important in boys fashions. Colours are plain and include neutral, black, navy, khaki green and tan. Gray is beginning to be popular.

WOMEN, 17-25

Stefszyn said boys and girls fashion is similar to the adult fashions. The clothing people are wearing "in high school and college transcends into the younger group. (The younger kids) all want to look like their big brothers and sisters."

The main difference between the younger girls and the older ones is sheer is more popular.

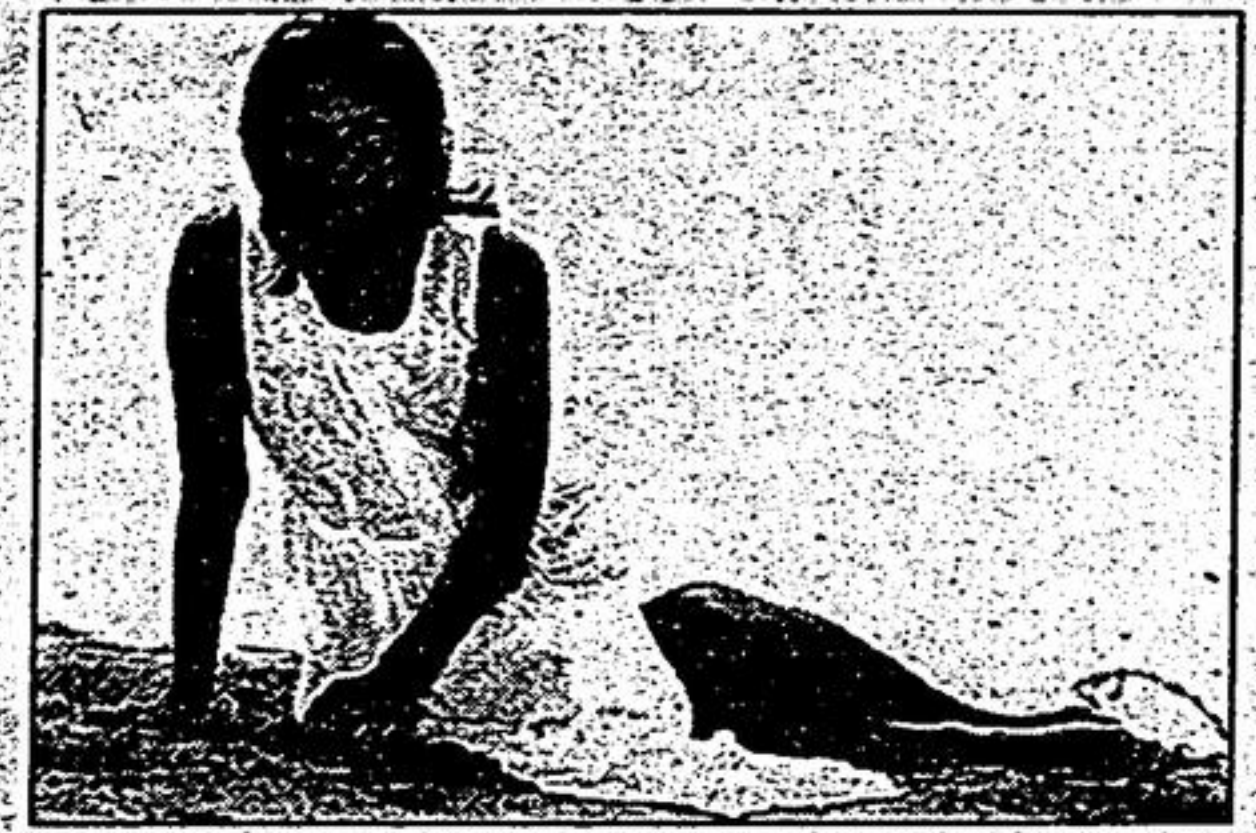

"Because of their age, they can get away with it." "Hot colours in warm weather fashion are naturals ranging from creamy neutrals to spicy vegetable colours with

pastels also being important," said Annie Helegda, Sears Canada's fashion director, womenswear.

"The key styles include fluid draw-string pants, tank tops, sheer fabrics, unstructured jackets, Capri pants, three-quarter-length sleeves and cargo pocks. Overall, the look of spring fashion is relaxed with a feminine, sophisticated simplicity."

Khakis are also popular.

"Khaki pants and a blouse is perfect in any season," he said.

Women's spring fashion is relaxed with a feminine look.

MEN 17-25

"In terms of styling, casual men's wear continues to be unstructured with a relaxed shape, which is comfortable and fashionable," Stefszyn said.

There is a lot of stretch in menswear with stretch dress pants and cotton khakis. Tops hang closer to the body and the full button, knit shirt with short sleeves are popular.

"The v-neck t-shirt is the piece" this spring. The colours are neutral with whites, blacks and grays.

Looking for employment?

fulltime part-time casual
