

Ceramic tiles can add style to your floors and surfaces

Are you tired of counting the stains in your carpet? Why not consider the many styles of ceramic, marble and porcelain tiles available.

"Spring is the perfect time to replace those musty, stained carpets," says John Moncada, co-owner of Markham Ceramic Tile in Markham. For several years, John and his brothers, Sam and Joe, have operated Markham Ceramic Tile, a successful, family-owned business that specializes in the sale and installation of quality tiles and accessories.

"The beauty of ceramic tiles is that they are relatively easy to install, easy to maintain, and they provide a great accent to any type of room," says Sam.

REPLACE DULL SURFACES WITH CERAMIC

Perhaps you've been living with torn, dull vinyl flooring in the basement for longer than you care to remember. There are many new styles and colours of ceramics being introduced this spring which could provide an attractive alternative. "They're affordably priced and can be installed in a couple of days," says Sam.

Or, you may want to consider covering that gray-coloured cement on the porch with a trendy, frost-resistant, non-slip porcelain tile. "Now is a great time to start planning such a project," says John.

In recent years, many home owners have opted for more decorative counter tops. With granite counter tops you'll never have to worry about staining, burning or scratching as they are very durable. Take advantage of Markham Ceramic Tiles special spring offer on granite counter tops - for a limited time only you'll pay no tax!

"We also offer a variety of custom stone work such as vanity tops, fireplaces and furniture," says Sam.

pride in being able to provide professional installation including new construction, upgrades or renovations at reasonable rates on all types of homes.

"Our unique approach has always been to make customers feel comfortable with our products and services," says John. "Whether you're looking to purchase tiles for a do-it-yourself project, or you require professional installation, we have the experience and the expertise to help."
