Total Manufacturing Solutions

SANMINA

Sanmina Corporation is a leading electronics contract manufacturing services company providing a full spectrum of integrated, value-added electronic manufacturing services. The company provides these services to a diversified base of leading OEMs in the communications, industrial and medical instrumentation and high-end computer sectors of the electronics industry. Sanmina's Enclosure Systems Division, headquartered in Toronto, Ontario is currently preparing to move into their new facility, one of the largest of its kind in the world, which will house state-of-the-art enclosure design, manufacture, integration and test capabilities.

SANMINA – BUILDING FOR THE FUTURE

Join us in our new world class facilities. We have immediate permanent full-time opportunities, with overtime available:

- Brake Press Operators** – Must be capable of performing own set-up, first off approval and running parts on Amada, Wysong and/or LVD 3, 4, 6 or 8 axis machines.
- Welders** – Qualified aluminum and steel welders. Must be able to read blueprints and weld in both Mig and Tig applications.
- Grind/Cleanup** – Must be able to operate and handle power grinding tools, remove weld excess and finish grind component parts.

The above positions are available for both day and night shift and we require Brake Press Operators for weekend shift as well.

Sanmina offers an attractive and complete compensation and benefits package, including a Deferred Profit Sharing Program, an Employee Stock Purchase Plan and ample opportunity for professional growth both within Canada and other international Sanmina Divisions.

When you join Sanmina, you'll find a workplace where people are empowered to perform. Explore the challenge — and experience the rewards.

Send your resume in confidence, or apply in person to:

Manager-ERP Database & Application Development

An Ajax-based Tier 1 automotive Parts Manufacturer, with 3 facilities in Ontario and 2 in the United States, requires person to fill the role **Manager-ERP Database & Application Development**.

Being the market leader, Jet Composites Inc. is growing aggressively as a global automotive moulded fiberglass products manufacturer. Recent organizational changes have created the opportunity for an individual to manage the integrity of all master and transactional data in our ERP systems, coupled with supervision of our Application Development Group. The successful candidate will have full responsibility for ensuring timely and accurate maintenance of all Master Data elements, along with accurate user-generated transactional data. An understanding of the underlying business processes is vital. This position also requires the ability to provide supervision and direction to programmers involved in application development.

Qualifications: University or College Degree in Computer Science, or equivalent experience. Knowledgeable in ERP Systems with a focus on manufacturing environments, and financial business processes. Minimum two years' supervision/management experience. QAD and Progress database experience desired.

Previous supervisory experience within Information Technology. Strong interpersonal, written and verbal communications. Ability to provide mature leadership, set and maintain departmental priorities.
