Lower your energy costs with energy-efficient windows and doors

Lower your energy costs with energy-efficient windows and doors. If you own a home that is more than 10 years old, you are likely missing out on the benefits of energy-efficient windows and doors. With oil and gas prices continuing to rise, installing energy-efficient windows and doors means that you can start reducing your energy costs by up to 15% instantly.

"The price of raw materials and production costs are expected to rise this spring," says Mike Montecalvo, co-owner of Encore Home Improvements. "Customers can save an additional 10% or more if they act now."

**NO DEPOSIT, NO PAYMENTS,
NO INTEREST FOR 6 MONTHS**

Another compelling benefit to acting now is a special financing arrangement. Encore Home Improvements now offers a **NO DEPOSIT, NO PAYMENT, NO INTEREST FOR 6 MONTHS** promotion through Scotiabank and SAWDAC (Siding And Window Dealers Association of Canada) for people who want to install energy-efficient windows and doors today.

"Customers can have their windows and doors installed today without having to pay a cent," says Montecalvo. "You can start saving money on energy costs immediately and can enjoy the products for six months on us."

Encore Home Improvements specializes in the sale and installation of quality, Canadian-made doors and windows for all types of residential homes and businesses. The company sells only premium products with lifetime warranties on parts and labour (non pro-rated).

Encore is also an authorized dealer for Garaga garage doors in the Markham area. Garaga Doors is

a leading manufacturer of quality residential and commercial garage doors in Canada.

ADVANCES IN WINDOW TECHNOLOGY

Typically, older windows represent a major source of unwanted heat loss, discomfort and condensation problems during winter. In recent years, advances in window technology have led to lower heat loss, less air leakage and warmer window surfaces that improve comfort and minimize condensation.

Many of Encore's customers are installing a new weatherproof, vinyl window that delivers higher efficiency. The new window is triple-paned and can outperform an R-40 wall. Rated as a high efficiency window by Energy Canada, this vinyl window features argon gas between the panes and a low-e coating on the glass itself.

Heat mirror, low-emissivity (low-e), argon and triple glass are some of the other technologically advanced windows available

today that can lead to significant energy savings.

Encore also offers quality, interior vinyl shutters manufactured by Vinylbilt (durable, attractive and maintenance-free) and high-tech aluminum doors in 10 standard colours (aluminum doors are lighter and never rust).

Encore takes pride in being part of the Markham community. The company supports several local charities and fund raising events. "We believe in giving back to the community," says Mike. "We also want people to feel comfortable dealing with us."

For complete information about Encore Home Improvements, check out the company's new web site at www.encorewindows.com.

Encore Home Improvements is located at 450 Alden Rd. For details call (905) 470-0750.

Affordable Permanent Hair Removal at Laser Care Clinic

Imagine going through life never having to wax, shave or tweeze an unwanted hair ever again? Sounds incredible. Now imagine doing it affordably, safely and faster than ever before. How?

The Laser Care Clinic in Scarborough at 2235 Kennedy Road, employs a brilliantly effective process called IPL or Intense Pulsed Light. How does IPL remove hair quickly and permanently? It uses highly controlled flashes of light which are selectively absorbed by hair-filled follicles lying below the surface of the skin. This absorbed light heats the hair, which damages or destroys

*This process
is a step
beyond
traditional
laser and
requires fewer
treatments.*

the regrowth potential of the follicle. All without damaging the surrounding tissue.

This is a long-lasting solution to unwanted hair and is FDA approved. This process is a step beyond

traditional laser and requires fewer treatments. And wintertime is ideal because people are recommended to avoid the sun while undergoing hair removal as the underlying skin will be sensitive to UV for a few days during exfoliation.

If you'd like to hear more, book a consultation and test patch now, just call (416) 754-9444 and ask for LIL. We'll take great care of you.
