and wind detectors. "Wind-sensitive awnings open and close automatically, depending on the wind conditions," says Anita. "This technically-advanced type of awning is perfect for when you're not at home."

The Aristocrat awning is available in over 30 different styles for any home or commercial use. All of the awning frames are constructed with extruded aluminum using either white powder coating or a satin anodized finish. These aluminum (with fabric) frames are lighter than steel-construction frames and can be easily recovered easily when the homeowner changes the colour scheme. All of the awnings are maintenance free and guaranteed not to rust.

There is also a decorative element to awnings that enhances the beauty of your home. Besides providing energy efficiency and protection against ultra violet rays, the right choice of awning style and colour will complement your exterior colours and trims.
