Laser hair removal for all skin colours

Laser hair removal is becoming more popular with both men and women and is here to stay, says Sheri Kurtz, owner of the Sherlase Clinic, Markham.

"When it comes to lasers, skin types, amount of hair and treatments there is a lot to consider. Our professionals care about removing unwanted hair. We constantly consult with you on proper procedures specific to you and educate you on what to expect from laser hair removal. We have one of the most up-to-date and most powerful lasers available in York Region. With this type of laser we have more than enough power to eradicate hundreds of hair follicles at once."

The clinic has the only FDA approved laser that is specifically designed to permanently reduce hair from all skin colours. Men and women, no matter whether they are tanned and regardless of skin colour can now make unwanted facial or body hair a thing of the past.

"At the clinic we pride ourselves on educating our clientele constantly, from the first consultation, during and after the procedure. Our professionals keep current on the latest trends and developments in order to deliver the best care possible. We hold demonstrations, seminars and information evenings in order to make

our clients knowledgeable and comfortable. All our consultations are confidential and free," says Kurtz.

The Sherlase Clinic offers an extensive range of advanced esthetic services that enhance the body without surgery. One area of expertise is laser vein therapy and sclerotherapy to treat spider and varicose veins.

The Clinic also offers Botox injections, Restylane and Perlane injections along with treatments for problem skin, including acne and pigmentation, Microdermabrasion, PCA peels as well as treatments to combat sun damage, age spots, fine lines and enlarged or oily pores.

The Sherlase Clinic is located at the southeast corner of 16th Ave. and Markham Rd.

Order energy-efficient windows and doors today and save

Winter is here, but that hasn't stopped Encore Home Improvements from installing doors and windows. This Markham-based company continues to satisfy clients who want to enjoy the benefits of energy-efficient doors and windows right away.

Encore Home Improvements specializes in the sale and installation of quality doors and windows for all types of residential homes and businesses.

"Energy-efficient windows are not only an improvement, but also an investment in home comfort," says Mike Montecalvo, co-owner of Encore Home Improvements. "They also save money on heating and air conditioning costs all year, and they increase home value."

Typically, older windows represent a major source of unwanted heat loss, discomfort and condensation problems during winter. In recent years, advances in window technology have led to lower heat loss, less air leakage and warmer window surfaces that improve comfort and minimize condensation.

Recently, Encore Home Improvements introduced krypton gas windows. "Krypton is an inert, nontoxic gas that is used in insulating windows to reduce heat transfer and create a warmer surface," says Mike. "Krypton gas windows are warmer and better insulated than argon gas-filled windows."

Another innovative window product offered by Encore is the Activ™ Glass by Pilkington. Activ™ Glass features a special surface that uses the sun's UV lights to break down and dissolve dirt and soil.

Active™ Glass is the world's first solar-powered, self-cleaning glass that uses the power of the sun to clean itself. This revolutionary technology uses a two-step process to keep windows clean.

"The Activ Glass has many features," says

Mike. "The self-cleaning properties virtually eliminate the need for window-washing. It's environmentally friendly because it requires less cleaning, no chemical cleaners and less detergent."

(For more information on Active™ Glass, visit the Encore web site at www.encorewindows.com).

Now is a great time to order energy efficient doors and windows. Interest rates are low, and Encore offers NO PAYMENT FOR SIX MONTHS for a limited time only. "By ordering today, customers will avoid the spring price increases," says Mike.

Encore stands behind its products and workmanship with a complete satisfaction and a lifetime warranty on parts and labour (non pro-rated). "If you have a service problem, we will come out right away," says Mike. "This is part of our total commitment to provide great products and peace of mind ownership."

Founded in 1987, Encore Home Improvements is a full service door and window company specializing in residential homes and businesses. The company also provides a full line of custom-made porch enclosures, sunrooms, interior shutters and exterior shutters for all types of homes.

Encore Home Improvements is located at 450 Alden Rd.
