Sat until 1pm

YORK REGION **WHEELS**

Who am I?

To guess my secret identity, read the following clues. Be sure to test yourself and try not to jump to the end for the answer! I'm watching, after all!

- 1) At age 8, I had won my first Quarter-Midget racing championship.
- 2) By age 21, NASCAR team owner Rick Hendrick signed me on to race.
- 3) In 1993, I won rookie-of-the-year honours in NASCAR's Winston Cup series, finishing in the top ten 11 times out of 30 races.
- 4) I'm a multiple Daytona 500 winner.
- 5) My former crew chief Ray Evernham now owns his own NASCAR team.

My name is Jeff Gordon and I pilot the number 24 car in the NASCAR Winston Cup series.

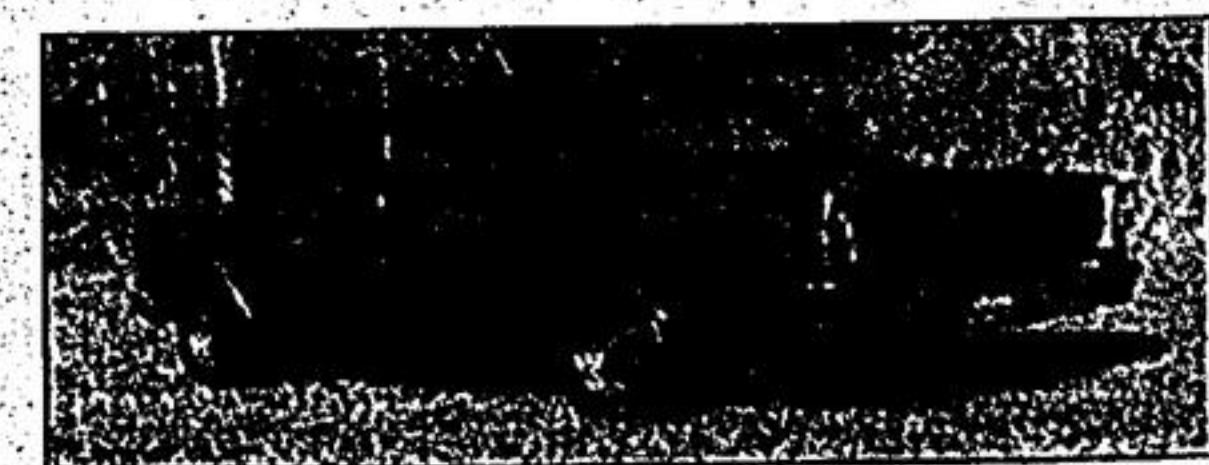

What's up, auto doc?

Quick test: does your vehicle use a timing belt, or a chain? Not sure? If you have a high-mileage vehicle, you're going to want to find out now — and not later — because the last thing you want is a timing belt that is so worn out it breaks. Like just about anything else on a car, a timing belt wears out and needs to be changed! (check your owner's manual for the recommended interval). While it's easy to let it go when all seems to be fine, a busy freeway is not the place to find out just how bad it really is.

Timing belts and chains keep the pistons travelling up and down in their cylinders in proper relation to the intake and exhaust valves opening and closing. When a belt breaks (chains almost never do) that harmony is lost and the engine simply can't function. In some cases, severe internal damage occurs as a moving piston plows face first into an intake or exhaust valve that became stuck in the open position when the belt broke. Since replacing the timing belt is much cheaper than tearing down and rebuilding your engine, you'll want to treat that belt with new-found respect and replace it when you should, not when you can. If you have a tip, email autodoc@wheelbasecom.com.

It's History

The Cadillac was the first automobile manufacturer to include an electric starter as a standard feature — in 1912. The company was also the first to add electric lights to its vehicles that same year.

Ebay watch

1966 Ford Fairlane 500, no bids, starting bid US \$8,900: You don't have to be a Ford lover to appreciate the lines of a 1966 Fairlane. This particular example, although it received no bids, was touted as highly detailed with only 55,000 original miles (88,000 kilometres) and a 289/two-barrel/automatic transmission combo. Manual steering and brakes were part of the package as was a set of Magnum 500 wheels and what was described as a virtually wear-free interior. Of note is that while the prices of most '60s-era classics has skyrocketed, the Fairlanes appear to have remained relatively affordable. Visit ebaymotors.com.

AUTO ALMANAC

Drawing Board

Lexus GX470: Positioned between the existing RX300 and LX470 (and due to arrive in January) the new GX470 will use Toyota's 235-horsepower 4.7-litre DOHC V8 that also sees service in the LX470 and Toyota's Tundra. The GX will also be boldly styled with in-vogue bulging fenders and an aggressive-looking set of alloy wheels. The new SUV will come with plenty of equipment, including rear air suspension with self-leveling, variable suspension damping and adaptive height control. No word on price yet, but expect to pay in the \$70,000 range.
